

Barry Snyder, Chair of the Planning Commission  
Jeff Shrum, Director Development Services

Gentlemen:

As members Environmental Advisory Board, having the responsibility to contribute to an integrated environmental strategy, we extend our appreciation that the revised Land Development Codes will have a separate section titled "Environmental."

Because of this prospect we seek to work in conjuncture with the consultants, planning commission and planning department to keep Venice Beautiful and Eco-Friendly and Preserve the future Quality of Life.

We respectfully request the opportunity for joint meetings to establish a process that will allow us to make a positive contribution in developing language in the Environmental Section that will be beneficial for all segments of our community.

In order to enhance the joint process we request copies of any draft proposals of the Environmental Section so we can be prepared to provide recommendations for the most effective conservation and preservation regulations.

Respectfully  
Environmental Advisory Board
