Mayor & Council

Attached is correspondence from Sarasota County requesting support for the construction of a mid-county Tax Collectors office. The project would be funded in part with accumulated Impact fees in the General Government category of Impact Fee funds. and the balance would be charged to the County General Operating budget.

The County has provided a model resolution for your consideration as well as a project data sheet. The data sheet displays the cost distribution for the proposed project. As shown, \$1.7 million of the project cost would come from accumulated Impact fees and the balance of the cost, \$3,89,000, would come from the County budget. The subsequent operating expense would also be charged to the County Operating Budget.

The proposed facility would replace two existing sites used for the services listed on the project data sheet, including a vehicle inspection site and driving test area.
