

25-73CP Comprehensive Plan Annual Development Data Update Staff Report

I. OVERVIEW

The 2017-2027 Comprehensive Plan provides multiple mixed use future land use designations within the seven neighborhoods of the City as follows:

Comprehensive Plan Neighborhoods	Mixed Use
Island	Downtown (MUD) Corridor (MUC) Airport (MUA)
Gateway	Seaboard (MUS) Corridor (MUC)
East Venice Avenue	Residential (MUR)
Pinebrook	Residential (MUR)
Laurel Road	Corridor (MUC)
Northeast	Residential (MUR)
Knights Trail	Corridor (MUC) Transitional (MUT) Residential (MUR)

Each neighborhood comes with a table of the development minimums and maximums for density, intensity, and existing conditions in the mixed use areas. These are based on information from the previous annual data update covering the period from November 1, 2023 through October 31, 2024, adopted through Ordinance 2025-09. The following Strategies pertain to this update process:

Strategy LU 1.2.18 - Mixed Use Categories, Monitoring and Reporting (applies to all Mixed Use Categories)

The City Planning and Zoning staff shall produce at a minimum an annual report on development activity within the Mixed Use Categories or when 75 percent of the applicable development threshold (max) has been achieved. Staff shall develop a tracking mechanism and include the percent development in conjunction with the thresholds of development established within the Mixed Use land use designations.

Strategy LU 1.2.19 - Thresholds Applied

The minimum and maximum thresholds in each of the Mixed Use categories are not intended to be an allocation of land but are used as a mechanism to determine the maximum density and intensity within each Mixed Use area and Neighborhood from which existing and future development will be deducted. The intent of this strategy is to eliminate the need to calculate/allocate a vertical mixed use development as a percentage of acreage. This strategy also recognizes that applications which propose to amend a property's designation to Mixed Use or the reverse shall also identify the revised and updated carrying capacity (maximum density and intensity standards) for the respective designation and Neighborhood standards.

The updated numbers provided in this report are for development activity from November 1, 2024 through October 31, 2025 in the form of entitlements on properties.

In the following tables, both residential units and non-residential square footage numbers are provided. In addition, growth percentages along with percentages of maximum development are provided for each mixed use designation in each neighborhood. Summary tables are provided at the end of this report. Based on this data, it can be determined where growth is occurring throughout the mixed use areas and if there is a need for adjustment to designation thresholds. Exhibit A attached to this agenda item provides the ~~striketrough~~/underline text for the changes proposed by this Comprehensive Plan amendment.

II. NEIGHBORHOODS

ISLAND

The Island Neighborhood encompasses approximately 2,817 acres or approximately 25.6% of the total City size. There are three mixed use designations within this neighborhood: mixed use downtown (MUD 84 acres), mixed use corridor (MUC 130 acres) and mixed use airport (MUA 127 acres).
