I am a resident of Toscana Isles, residing at 324 Palestro Street. My property directly borders the drainage area that flows from Toscana Isles to the Weir. This drainage system runs directly through the parcel in question.

The Weir plays a critical role in our community's stormwater management, as it enables water to exit the development and flow into the surrounding waterways. If the Weir were to become obstructed or compromised in any way, it could result in significant flooding within the community.

Given the importance of this drainage path and the Weir to the safety and well-being of our neighborhood, I am strongly opposed to any development on this tract, as it poses a direct risk to our community's infrastructure and flood protection.

Nokomis, FL 34275

SUBJECT: Planned District Zoning Amendment (25-01RZ)

Amending the Toscanan Isles Binding Master Plan to allow townhomes in Subarea 3 and adding an access point along Gene Green Road.

Dear Planning Commission / City Clerk,

We are residents of Toscana Isles, residing on Pescador Place.

Properties in this subdivision directly border the drainage area that flows from Toscana Isles to the Weir. This drainage system runs directly through the parcel in question.

The Weir plays a critical role in our community's stormwater management, as it enables water to exit the development and flow into the surrounding waterways. If the Weir were to become obstructed or compromised in any way, it could result in significant flooding within the community.

Given the importance of this drainage path and the Weir to the safety and well-being of our neighborhood, we are strongly opposed to any development on this tract, as it poses a direct risk to our community's infrastructure and flood protection.

We ask that you NOT approve this new construction due to the danger it poses to our community's safety.

Please enter this into the record for public comments

Hello.

My name is Perry Crawford. I'm a resident of Toscana isles. I have lived all 38 years of my life in Venice. I graduated from Venice High in 2005. I'm sure as you know, Venice has grown a great deal since I was a kid. I'm happy to see this small town grow. However, I'm against the building of the town homes specifically at PID #3066-13-0002. My backyard backs right up to this property and town homes would have a negative effect on my property values. It would ruin the view I have from my back yard. As well as ruining my privacy. Townhomes would have a direct view into my backyard, living room, and bedroom. In addition to the loss of privacy, the area has wildlife that we enjoy viewing in my neighborhood. The loss of wildlife area would disrupt gopher tortoises, sandhill Crain, blue jays, raccoon, and many others. I asked that you vote against it for a lifetime native of Venice. Not another corporate builder and development company. There are empty condos all over Venice for sale. There's no shortage of properties.

Thank you for your time
Perry Crawford.

I oppose this development. There is too much development and not enough roads and other infrastructure to support this additional traffic. The water shed problem is being completely compromised.

Section 1 - Challenge to Developers Assertions that Tract 17 – PUD 0366130002 does not contain adequate Flora, Fauna, and Ecological Considerations to prevent Development

Response:

False

Sarasota County granted me the opportunity to speak before the Environmentally Sensitive Lands Oversight Committee meeting in Venice on Thursday December 5, 2024 to consider purchase of Tract 17 and establish it as a County Owned Preserve. That was based on the evidence and documented facts provided to them included below. On December 3, 2024, I received an email from Brie Ondercin, Park Planning and Development Division, that the owner of the property was not interested in selling at the moment but might consider in the future if plans fell through. My invitation to speak was rescinded at that point, as this was a voluntary property owner program to sell.

Ms Ondercin also included in the document below that if plans did fall through, this property would be reconsidered for purchase by the county

Photographic evidence and factual data counters the Developers claims of no specialized protected fauna, only 1 heritage tree, and minimizing the soil composition re ecological sensitivity

Please see application, documentation and allocated 3 minute speech included.

LAND ACQUISITION PROGRAM NOMINATION FORM

Please use this nomination form to nominate property for consideration for acquisition by Sarasota County through purchase, donation or conservation easements in accordance with the terms set forth in the acquisition program and associated criteria. This form may also be used by a citizen wishing to nominate any property in the county for acquisition, whether owned by that person or not.

ARE YOU THE PROPERTY OWNER? Yes ☐ No ☒ (If not, please be aware that this is a willing seller program.)

YOUR CONTACT INFORMATION

Name: Carlo Quintiliani	Telephone No: () 516 395 9247
Address: 673 Maraviya Blvd	Email (optional): carloq1949@gmail.com
City: N Venice	State: FL ZIP: 34275

I am nominating this property for consideration as: (Please select one or more of the choices below.)

☒ Neighborhood Parkland ☒ Environmentally Sensitive Land ☒ Other (please explain below)

Parcel Identification No. (if known): Tract 17 PID 0366130002	Street Address of Property (if available): 0 Knights Trail Road Nokomis Fl 34275
---	---

Location of Property (please be specific):

346,409 sq ft bordered by Knights Trail Road on the West, Gene Green Road on the North, The fenceline and weir of Toscana Isles on the East, Villoresi Blvd and the North Gate of Toscana Isles on the South. Last listed with SVN International Realty. Owned by Wisdom Properties

The nominated property has the following features (select all that are applicable):

- | | |
|--|--|
| ☐ Historical / Archaeological Value | ☒ High quality / unaltered habitat |
| ☒ Rare habitat and/or listed species | ☒ Open space |
| ☐ Located more than 5 miles from an existing park or preserve | ☒ Wetlands |
| ☐ Access to water (Gulf of Mexico, bay, river, or creek frontage) | ☐ Adjacent to existing public lands / trails |
| ☒ Existing structure(s) | ☒ Other (please explain below) |

Description of property / resources:

(Briefly describe this property's features, including any existing structures on the site; please be specific.)

Tract 17 is undeveloped & should be considered for Florida Natural Beauty Preservation. It is 2/3rds heavily tree & shrub lined with a bordering plain and has important wetlands flanking a single weir controlling water flow from Toscana Isles 200+ acres of water @ 3 acres of the 7.92 acres of Tract 17 cannot be developed because of the weir, easements, and a failed mitigation area Extending from Knights Tail Rd water flows west to east through the protected wetlands of Toscana Isles and its channel These Wetlands, the channel, its water, stormwater collection pond, trees and flora all support and feed wildlife the residing within Tract 17

List the reasons you believe this property should be acquired: (Please review and consider the program criteria below.)

- 1) Tract 17 is a Sandhill Crane, Blue Heron, Shelter & Chick Rearing Sanctuary. They regularly walk/fly from the north lake to take shelter within it
- 2) Their habitat has shrunk from the 417 acres of Toscana Isles, of which 200 acres of freshwater retention ponds, where they feed & breed
- 3) Possible protected Flora due to tree girth and protected species - last survey done 13 years ago,
- 4) Wabasso Fine Sand, drainage loss of Holopaw, HauGallie & Myakka sand & organic ground cover,
- 5) Protection from development of @11,829 new housing units in and around the adjacent area, preservation of Florida Natural Beauty

FW: Knights Trail Property - Owner Contact Request

Inbox

B

Brie Ondercin <bonderci@scgov.net> Dec 3, 2024, 10:41 AM

to me

Hi Carlo,

Hope you had a wonderful Thanksgiving.

We reached out to Ashley Bloom, part owner and representative of the Wisdom Properties, LLC property on Knights Trail Road. We've confirmed that they are NOT willing sellers as the property is currently under contract. If the contract should fail, the property owners would be interested in having a conversation with Sarasota County about our land acquisition programs. Please see the email exchange below.

Because of this status, I've been directed by my manager to remove the item from our meeting agenda for this week's Environmentally Sensitive Lands Oversight Committee (ESLOC) meeting on Thursday, December 5 at 2:30 pm at the Venice Community Center at 326 S, Nokomis Ave, Venice. This item and property will no longer have a preview at the ESLOC meeting this week. You are still welcome to attend the meeting as it is open to the public, but there will not be any discussion or review/preview of the property.

If there's a future opportunity to review/preview the property should the current contract fail, I'll let you know. We'll keep it on our radar for future consideration. Please feel free to reach out to me with any questions you might have.

Thank you,

Good Afternoon

Tract 17 It is part of an interrelated, integrated, communally dependent ecosystem

Tract 17's rectangular 8 acres are an ideal combination of grassy plains, thickly populated mature trees, and intertwined underbrush that are uniquely positioned for Sandhill Cranes, Heron and others use for shelter and protection. It is a perfectly located and nurturing oasis for this and other reasons

100% of 203 acres of water flow through our mutual wetlands, open channel and its singular weir, providing an abundant food source for wildlife. Small fish are carried through or trapped by the retention wall of the weir by the water flow, or are displaced into the shallow pond area between the weir and the culvert, providing a steady, excellent source of available food for the birds that frequent Tract 17

Aquatic birds, turtles, alligators, raccoons, and other fauna are drawn there to feed, rest and shelter.

The combination of the attraction of the freshwater ponds and surrounding diminishing habitat has evolved Tract 17 into being a natural sheltered sanctuary with immediate adjacency to the North Lake boundary.

The area, farmlands in the 1980's, is also now home to multiple tree species in excess of 35 feet in height and 36 inches in girth.

The combination of isolation, shelter, food and adjacency to the ponds are an essential consideration in this petition Please refer to attached photos

Additionally, the planned expansion of Knights Trail Road parallel to Tract 17 would pre-emptively give Sarasota County a strategic advantage in possessing and regulating the land and parsing out the apportioned quadrant required for expansion, short yards from our weir, wetlands and singular culvert that handles all water exiting under Knights Tails Road

I petition this council to consider all of the aforementioned with the backdrop of what is happening to the natural beauty of Florida, anchored by our fauna, flora and visual attributes, for all of us in an anticipatory manner reverse the vanishing natural footprint for multiple species to go about their natural lives, shelter, reproduce, and successfully raise their hatchlings.

While 8 acres may not be much quantitatively in the larger scope of things, it qualitatively means the world to all of us who want to see progress go forward in an imaginative and beneficial manner.

I thank in advance for your time and consideration

Section 2 – Challenge to the Developers minimalization of the potential for a flooding event as it regards the channel leading to the weir clogging on their property from Toscana Isles

Direct Quote from Wisdom Townhomes Decision Criteria 1.7.4 – Article 6

“Effect on health, safety and welfare of the neighborhood and City

. The proposed PUD amendment could be seen to have no impact on health, safety or welfare of the neighborhood and City.”

Please note the use of the phrase “COULD BE SEEN” as opposed to “WOULD BE SEEN” – Conjecture vs Obligation

In Bullet Points –

- 1) Toscana Isles has 969 residences in immediate proximity to 203 acres of water retention ponds within its boundaries
- 2) The ponds are designed not only to accept rainwater from our property but runoff from properties immediately south AND east of us
- 3) Myaaka River overflow drains from its banks flowing north towards us – in fact Laurel Road immediately south of us has had multiple City issued flood warnings and actual events within recent memory
- 4) There will be ongoing paving of lands and increased water flow into our water retention ponds as development continues
- 5) For every foot of water that rises above crest in Toscana Isles, approximately 70,000,000 gallons of water have nowhere to go.

THE NARROW CHANNEL THAT LEADS TO THE WEIR IS THE ONLY POINT OF WATER EVACUATION FROM THE WATER RETENTION PONDS -- THIS ALL FLOWS THROUGH THE WISDOM PROPERTY INTO A SMALL CULVERT UNDER KNIGHTS TRAIL ROAD

- 6) The Culvert is overloaded in a major weather event – City engineers were not aware that the water flowed from 3 entrance points, North to South, East to West and South to North, converging at the Tract 17 culvert. See photos attached. I emailed them this upon their request for review and evaluation.
- 7) The water referred to also pooled and remained pooled on the west side of Knights Trail Road for months afterwards. The city and county were notified.

Wisdom Townhomes Decision Criteria 1.7.4

1. Whether the amendment is compatible with the existing development pattern and the zoning of nearby
 - **The proposed PUD amendment can be seen as compatible as the amendment is part of the Toscana PUD. Subarea 3 of the PUD master plan allows for a variety of both commercial and residential uses. The proposed townhomes would use 50 of the permitted 1,062 multifamily units.**
2. Changes in land use or conditions upon which the original zoning designation was based.
 - **The site is permitted for commercial and multifamily dwellings. The proposed townhomes could be seen as consistent with the original zoning designations of the PUD.**
3. Consistency with all applicable elements of the Comprehensive Plan.
 - **The proposed PUD could be seen consistent with all applicable elements of the Comprehensive Plan and Toscana Isles Binding Master Plan.**
4. Conflicts with existing or planned public improvements.
 - **To the best of our knowledge, there are no conflicts with existing or planned public improvements.**
5. Availability of public facilities, analyzed for the proposed development (if any) or maximum development potential, and based upon a consideration of the following factors:
 - a. Impact on the traffic characteristics related to the site.
 - b. Impact on population density or development intensity such that the demand for schools, sewers, streets, recreational areas and facilities, and other public facilities and services are affected.
 - c. Impact on public facilities currently planned and funded to support any change in density or intensity pursuant to the requirements of the Comprehensive Plan and applicable law.
 - **The subject site has availability of public facilities, and a traffic impact statement has been submitted. A more detailed analysis of public facilities, density, and public facilities will occur at the time of Site and Development.**
6. **Effect on health, safety and welfare of the neighborhood and City.**
 - **The proposed PUD amendment could be seen to have no impact on health, safety, or welfare of the neighborhood and City.**
7. Conformance with all applicable requirements of this LDR.

- **The proposed PUD amendment shall be in conformance with all applicable requirements of the LDR.**
8. Potential expansion of adjacent zoning districts.
 - **The property is part of the Toscana Isles PUD and the PUD has set boundaries.**
 9. Findings of the Environmental Assessment Report, consistent with Chapter 89.
 - **An Environmental assessment report has been conducted and all information is attached.**
 10. Any other applicable matters pursuant to this LDR, the Comprehensive Plan or applicable law.
 - **Any other applicable matters pursuant to this LDR or comprehensive plan will be addressed by the Applicant.**

Video of water inflowing into the Knights Trail Road culvert from multiple directions from Toscana Isles on Tract 17

3 messages

Carlo Quintiliani <carloq1949@gmail.com>
To: jclinch@venicefl.gov

Tue, Nov 26, 2024 at 2:55 PM

Good afternoon, James:

It was both a pleasure and a terrific educational experience to have met with you and your team yesterday

Attached for your review and consideration, as per our brief interaction as we were all saying our goodbyes, please find a video taken Aug 5. It shows water flowing into the culvert from the eastern portion of Knights Trail Road off of Tract 17. You will see that water coming in from 3 separate directions - east to west from the weir, then south to north and north to south from channels that are on the same eastern portion of Knights Trail Road.

Happy a very Happy Thanksgiving!

Carlo Quintiliani

Thanks Carlo – I have received the video.

Appreciate you sending this and I will share it with the other City staff who attended our meeting yesterday. I hope you have a great Thanksgiving.

**TOSCANA ISLES PLANNED
RAINWATER/STORMWATER
MANAGEMENT OVERVIEW (1)**

**ACTUAL EXTERNAL WATERFLOW
DIRECTIONAL FLOW INTO AND
OUT THE TOSCANA ISLES WEIR (2)**

**RESULTANT ONGOING LACK OF 48
HOUR RECOVERY (3 & 4)**

- Toscana Isle Weir controls lake water levels for all adjacent residential and commercial properties
- Weir was designed and built well before current accelerated and unprecedented land development efforts.
- Impact of development to date has resulted in a reduced capacity to maintain lake levels due to increased inflow and restricted outflows.
- Further planned development will only further increase the inflow of water while not addressing the restricted outflow resulting in a further reduction of surge capacity to deal with significant rain events as evidenced in some of the more recent storms and Myakka River flooding.

100 YEAR FLOODPLAIN	ENCROACHMENT (Ac.-Ft.)							
	COMPENSATION (Ac.-Ft.)							
	COMPENSATION TYPE							
	ENCROACHMENT RESULT (ft)							

COMMENTS: Water quality treatment will be provided in the stormwater ponds via permanent pool wet detention. The Engineer-of-Record (EOR) has demonstrated that the post-development 25-year, 24-hour discharge rate will be limited to the pre-development 25-year, 24-hour discharge rate. This permit also includes the reconfiguration of a portion of Lakes 1, 2 and 3. In addition, the stormwater pond located to the south of the project (permitted under ERP No. 44017746.002) will be filled and water quality treatment and water quantity attenuation will be provided in the existing stormwater management system.

C. Wood 6/3/14

Section 3 Regarding Right of Easement

From Documentation provided by SWFWMD, Instrument Number 2012133871, nonexclusive perpetual drainage easement rights on the channel leading from the water retention ponds, through tract 17, to the weir -- were granted to the HOA

To this day, The Toscana Isles HOA manually clears the critical channel that traverses Tract 17 to the weir.

That channel is the ONLY SINGULAR point of water evacuation from all of our 203 acres of water retention ponds

If unimpeded or unblocked right of easement within the channel cannot be established for the purpose of keeping the channel clear, and that bridge is the cause of the problem, then that bridge cannot be constructed

Submitted for your review are the plat and assignment of right of easement.

Subject: RE: Toscana Isles Plat w/ Easements

To: Carlo Quintiliani <carloq1949@gmail.com>

Hi Carlo!

Sorry about the delay!

I'm not quite sure how official records are changed, if at all, for perpetual easements. I pulled the Articles of Incorporation for the HOA – **Instrument Number 2012133871**. If you have a look at **Articles 13**, it might have the info you're looking for. **It appears the easement rights remain with the developer, its successors and assigns, and specifically nonexclusive perpetual drainage easement rights were granted to the HOA.**

Let me know if this helps!

Kind regards,

Nick

Nick.Rajcoomar@swfwmd.state.fl.us

Section 4 - Wisdom Properties seeking access from Gene Green Road and the inherent Dangers of Granting that Access **IT IS THE LAST POINT OF MAIN ENTRY/EXIT AVAILABLE**

On September, 2024 judgement was passed in Civil Court against the Plaintiff, Wisdom Properties, to access entrance onto Tract 17 from the North Gate of Toscana Isles. This judgement was irrevocable and was granted into perpetuity. Left without viable alternatives, Wisdom is now attempting to get access for their main entrance on Gene Green Road.

THIS IS ANOTHER DIRECT CONTADICTION TO WISDOM TOWNHOMES DECISION CRITERIA

1.7.4. article 6 that states "The Proposed PUD amendment could be seen to have no impact on the health, safety, or welfare of the neighborhood or city"

I trust that the ownership of Ajax Paving and other affected individuals on Gene Green Street would address this in a professional and detailed manner, as I am certain they already have or are in the process of doing. Kindly utilize their knowledge and expertise to supplement this

Observations:

1) A fully laden Cement Truck weighs anywhere from 63,000 to 72,000 pounds. Travelling at 35 mph, calculating average weight of 67,500 pounds, an AI generated answer is as follows "Under ideal conditions, it would take a large commercial vehicle weighing 67,500 pounds approximately 6.87 seconds to stop from 35 mph, accounting for both reaction and braking time. In ideal conditions, an alert driver in a 67,500-pound commercial vehicle traveling at 35 mph would need approximately **220 feet** to come to a complete stop. This is significantly longer than the stopping distance for a passenger car due to the vehicle's immense weight."

And that does not account for fine sand or gravel on the road from these trucks, inclement weather, darkness or a combination of all three. A car weighing 3,500 pounds would stop **@ 100 to 125 ft** depending on ideal conditions for comparison

- 1 There is no traffic light on the corner less than 500 feet from the exit, which has innate blind spots and impossible reaction times
- 2 This is an unlit, narrow, single paved road that has no divider
- 3 The proposed entrance/exit would have leave very little reaction time to judge both what is coming inbound from Knights Trail Road and going from Gene Green Road to Knights Trail road
- 4 The overwhelming heavy commercial traffic composition of Gene Green Road in both directions is a portent for disaster at this Exit/Entrance point
- 5 **The widening of Knights Trail Rd to 4 lanes will further reduce reaction time from the proposed solitary entrance and exit**

Wisdom Townhomes Decision Criteria 1.7.4

1. Whether the amendment is compatible with the existing development pattern and the zoning of nearby
 - **The proposed PUD amendment can be seen as compatible as the amendment is part of the Toscana PUD. Subarea 3 of the PUD master plan allows for a variety of both commercial and residential uses. The proposed townhomes would use 50 of the permitted 1,062 multifamily units.**
2. Changes in land use or conditions upon which the original zoning designation was based.
 - **The site is permitted for commercial and multifamily dwellings. The proposed townhomes could be seen as consistent with the original zoning designations of the PUD.**
3. Consistency with all applicable elements of the Comprehensive Plan.
 - **The proposed PUD could be seen consistent with all applicable elements of the Comprehensive Plan and Toscana Isles Binding Master Plan.**
4. Conflicts with existing or planned public improvements.
 - **To the best of our knowledge, there are no conflicts with existing or planned public improvements.**
5. Availability of public facilities, analyzed for the proposed development (if any) or maximum development potential, and based upon a consideration of the following factors:
 - a. Impact on the traffic characteristics related to the site.
 - b. Impact on population density or development intensity such that the demand for schools, sewers, streets, recreational areas and facilities, and other public facilities and services are affected.
 - c. Impact on public facilities currently planned and funded to support any change in density or intensity pursuant to the requirements of the Comprehensive Plan and applicable law.
 - **The subject site has availability of public facilities, and a traffic impact statement has been submitted. A more detailed analysis of public facilities, density, and public facilities will occur at the time of Site and Development.**
6. Effect on health, safety and welfare of the neighborhood and City.
 - **The proposed PUD amendment could be seen to have no impact on health, safety, or welfare of the neighborhood and City.**
7. Conformance with all applicable requirements of this LDR.

- **The proposed PUD amendment shall be in conformance with all applicable requirements of the LDR.**
8. Potential expansion of adjacent zoning districts.
- **The property is part of the Toscana Isles PUD and the PUD has set boundaries.**
9. Findings of the Environmental Assessment Report, consistent with Chapter 89.
- **An Environmental assessment report has been conducted and all information is attached.**
10. Any other applicable matters pursuant to this LDR, the Comprehensive Plan or applicable law.
- **Any other applicable matters pursuant to this LDR or comprehensive plan will be addressed by the Applicant.**
