City of Venice Memo

To: Mayor Holic, Council Members, Charter Members
From: Vice Mayor Bob Daniels
Re: Partnership with County Vocational/Technical School (SCTI)
Date: October 22, 2013

Recently the City Manager and I visited the County Voc./Technical School (SCTI) for high school students and post high school adults to discuss internships and utilities water operator training.

The major objectives of the partnership are:

- 1) Provide students with real projects to learn from and to develop
- 2) Provide students with the experience of working in government settings

There will be a review of various possible partnerships with a SCTI coordinator who is a former Venice High School teacher. Possible areas to be considered are:

- * Public works sidewalk inventory
- * Programming policy/ordinances spreadsheet to an e-mail system
- * Water utility operator training
 - state curriculum
 - program certificate
 - possible retaining funding
 - possibility of Venice having its own class

Internship Operation

- * Free to employer
- * Must agree on scope and objectives (city and SCTI)
- * Term varies from four months to a year
