Subject: Fwd: New official rule language

Hi Mayor Holic

The official rule language for shore based shark fishing is not released yet, as the FWC legal department has not released final rule language.

We pushed for and got the change at the last minute to require the line to be cut, so this sent the official rule language back to their legal team.

But the summarized rules in the press release is the generic layman's language that you can work with.

That's right, the rule itself was changed but they needed to write the actual text of the rule language with our legal staff (that part usually takes some time and we typically do that months in advance of rule proposals)

Hi,
Yes it is still being worked on (to my understanding) because it was changed at the Gainesville meeting but I will double-check and get back to you soon!

Hi,
Can you please help me find the link official new rule for LBSF?
Is it possible it might not be released yet because we changed it in Gainesville?
Thanks!
