### ABOUT THE PROJECT

The Venice Multi-Modal Transportation Master Plan aims to improve and strengthen the City's transportation network for all modes of travel. This Plan builds on previous local, regional, and state planning efforts and initiatives for transportation and land use. This Plan will outline specific transportation improvements within the City and will prioritize local streets for future multi-modal facilities and improvements. With the Multi-Modal Transportation Master Plan, the City of Venice is taking steps to safely connect residents and visitors to their destinations and recreation activities.
