Subject: Re: SMH - Venice Groundbreaking

OK, thanks Jeff -

this is very positive news, as it will certainly reduce the noise associated with traditional pile-driving;

one other question: it was brought to my attention very recently that the City of Venice was working together with SMH on **creating a new fresh water well** directly within this 65 +/- acres of private, commercial land.

Do you know whether this water well will exclusively supply the hospital and future associated medical buildings along Pinebrook, or will this public water well link in to existing potable water lines to the WEST of the new hospital facility ?

If the water well is for the exclusive use of hospital- and medical complex consumption, what type of private funding is being proposed to pay for the upcoming well installation and ongoing well maintenance ?

I may need to contact the Venice **Utilities Department Manager, Javier A. Vergas**, regarding this detailed question, or you could kindly forward the inquiry.

Many thanks, Tim Montgomery

Mr. Montgomery,

My name is Jeff Hackett and I'm the Engineering Tech for the City of Venice assigned to the SMH project. I have been in contact with the project super and inquired if they were driving piles. His response was that all the building footers are to be drilled and filled with concrete. If you have any more questions my cell number is 941- 445-7640. I'll answer any questions I can, If I don't have the answer I'll ghet it to you as soon as I find out the answer.

Regards, Jeff

Mr. Montgomery,

I am not aware of any more restrictive construction times. The code indicates the times construction can occur. The code does have regulations regarding exceeding certain noise levels for specified amounts of time. The Police Dept. would be the agency that investigates issues regarding noise levels so I am not very familiar with the process. I have included a link below for our noise ordinance that you can review. I failed to add the Engineering Dept. staff to the previous email so I have included them on this one.

https://library.municode.com/fl/venice/codes/code_of_ordinances?nodeId=SPAGEOR_CH34EN_ARTIINOCO

Thanks,

Roger

Subject: RE: SMH - Venice Groundbreaking

Thanks for that partial update, Roger.

There are a few small farm homes immediately south of the Powerlines on the East side of Pinebrook -- they are probably lots that are currently zoned "Agricultural/Farming", so assuming the construction is, in fact, closer than 50 yards to such a Residential area, what would those more restrictive construction times look like ?

6AM is really early for many people.

I am especially concerned once they start driving the deep steel piling for the many foundation pillars.

It was reported at a previous meeting that the limestone rock-layer could be up to 70 feet deep.

As you well know, pile drivers are extremely noisy.

Thank you for your preliminary feedback.
Would appreciate more granularity on the question i raise above.

kind regards, Tim Montgomery
Venice Resident and Homeowner

Mr. Montgomery,
Thank you for including me in this email. I have copied the City's code regarding construction prohibitions below.

Construction and demolition. Operating or causing the operation of any tools used in construction, drilling, repair, alteration or demolition work between the hours of 9:00 p.m. and 6:00 a.m. on weekdays, or between 9:00 p.m. and 9:00 a.m. on weekends or holidays, in or within 50 yards of any residential area or **noise**-sensitive zone, except for emergency work by public service utilities or by other variance approved by a board or commission of the city council empowered to grant variances. This subsection shall not apply to the use of domestic power tools as specified in subsection (11) of this section.

I have also copied the City Engineer and staff regarding your other questions as they manage construction sites. Contact me with any other questions.

Thanks,

Roger

Ms. Leigh Wilcox

Sarasota Memorial Hospital

Public Relations Coordinator

Hi Leigh -

**cc: Mr. Gene Hines / SMH Neighborhood Advisory Council Chairman and Sorrento Ranch Homeowner,
Mr. Roger Clark, City of Venice Planning**

Just wanted to know when the next Neighborhood Advisory might be scheduled ?

there are a few issues / questions that might need some clarification and response from your Construction Management Group over the coming weeks, if not sooner :

1. Is it possible to spray the dirt/gravel entry area of the major construction entryway with a dust-reducing substance (in the past, they used to spray the dirt roads with a hygroscopic liquid to help mitigate dust formation) ?

I ask because the general amount of dust being created by large truck entry + exit has lead to much airborne dust;

The dispersion of such dust is unhealthy for (older) persons with breathing problems, and there is an increased risk of casting mold spores into the air as the pre-existing drainage lake has been removed along with the wet materials.

Furthermore, the Italian Restaurant just across the street in the Publix Shopping Center has an outdoor patio for people dining. I am actually surprised that this matter has not already been addressed by the Land Excavators

2. As the days get longer, I am concerned that the noisy construction activity will take place at an earlier point in the day; the workers will especially favor the VERY EARLY morning option to avoid summer heat. What are the SMH-condoned construction times and do they deviate from the relaxed Sarasota County requirements ?

Since it appears that Sarasota County holds the management function over such matters, has SMH told its excavators that the Lot Owner may have more stringent requirements regarding the noisy building activity; I can assure you that people in my Windwood Neighborhood hear the safety back-up alarms on the trucks every day, beginning around daybreak

3. In the process of clearing the SMH land, a large (natural) pond/lake was removed. The water captured in this large body of water has been essentially pumped out into a drainage culvert on Pinebrook Road (see attached picture) over a period of at least 2 weeks -- a situation that has significantly raised the water level of the wetlands area immediately to the Southwest of the SMH Building Site (see 2nd attachment with local map of the area)

This water spills over into the "wetlands area" on to the South and West of the SMH building site. Once again, this matter probably comes under the purview of Sarasota County, but I was wondering if this type of excessive water-dumping was an allowed one-time event, or if it will become standard practice for removing water from the 65 +/- acres ?

The issue of capturing and holding your own water is very important and will definitely need to be well-planned by the appropriate land surveyors and engineers. I am pretty certain that any new development CANNOT routinely spill its residual surface water into open water spaces -- as is the case now. I have a home directly next to the wetlands preserve just Southwest of the construction site (about 1/2 mile) and have noticed that the natural water levels in the adjacent Wetlands have not receded this Spring, despite a relative dry few months.

In past years, this wetlands area had become fully dry and crossable by mid-May.

It is important that this "water buffer" dries out before the wet season starts in early July, with typical heavy rainfalls.

Leigh, we may not be re-convening the SMH Neighborhood Advisory Board until later in the summer, but I believe these are 3 important issues that should be brought to your attention and issues that should be added to the forthcoming meeting agenda for the purpose of updating the nearby Homeowners.

PS - I have included Mr. Roger Clark (Venice City Planning) in this memo so he can understand these issues and provide resolution, where applicable.

Many thanks and kind regards,

Tim Montgomery

Dear Neighborhood Advisory Council Member –

You may already know from the article in today’s Sarasota Herald-Tribune, but I wanted to share that a date has been confirmed for the groundbreaking of the new SMH-Venice hospital – Thursday, April 4, 10 to 11 am. More details to follow closer to the event.

As always, thank you for your interest.

Best,
Leigh

Thank you Sharon -

Yes, I did retrieve your email messages and apologize the original message was targeted as spam.

Mr. Roger Clark (CoV Planning) has provided some preliminary detail regarding the permissible construction times -- which is good to know so that these types of site-related unpleasanties can at least be communicated to the nearby Residents..

Thank you and Leigh, also, for initiating the next Neighborhood Advisory Meeting.

Like the last meeting we held, it is probably a very good idea to include at least one City of Venice Planning person so they can hear the discussion and provide relevant input and/or speak with their Team for clarification.

Regarding the prevailing construction times, Roger Clark has already kindly provided the following update (for your general information):

Mr. Montgomery,

I am not aware of any more restrictive construction times. The code indicates the times construction can occur. The code does have regulations regarding exceeding certain noise levels for specified amounts of time. The Police Dept. would be the agency that investigates issues regarding noise levels so I am not very familiar with the process. Tim, Leigh forwarded me your email related to concerns at the construction site. Thank you for making us aware of the issues. We have reached out to our contractor and civil engineers to address your concerns. I expect to have a response to you as soon as possible. I've also asked Leigh to schedule a Neighborhood Advisory Committee, so we can bring everyone up to speed. Again, thank you and I'll be in touch soon with a response and/or plan to address your concerns.
