Dear Mr. Clark,

I want to bring to your attention the presence of an active Eagle's Nest ("SA088") near the site where the Stiles Corporation wants to build multi-family homes. The Eagles have successfully nested there the past three years. Below and attached is a copy of a map I retrieved from the Florida Audubon Eagle Watch program. The circle marks 660 feet from the nest. <https://cbop.audubon.org/conservation/about-eaglewatch-program>

The Florida Fish and Wildlife Conservation Commission advises:
<https://myfwc.com/license/wildlife/protected-wildlife-permits/eagle-permits/>

Eagle Permits

The FWC advises landowners to consult with the U.S. Fish and Wildlife Service to determine if a federal permit is required when proposing land use activities within 660 feet of an eagle nest.

A USFWS permit is needed for activities with the potential to disturb nesting bald eagles, or to remove or “take” a bald eagle nest. You can review information about federal eagle permitting regulations.

I trust the City of Venice or the applicant will engage a licensed environmental consultant to determine appropriate response to protect this nest.

I look forward to seeing updates. .

Thank you as always for your attention.

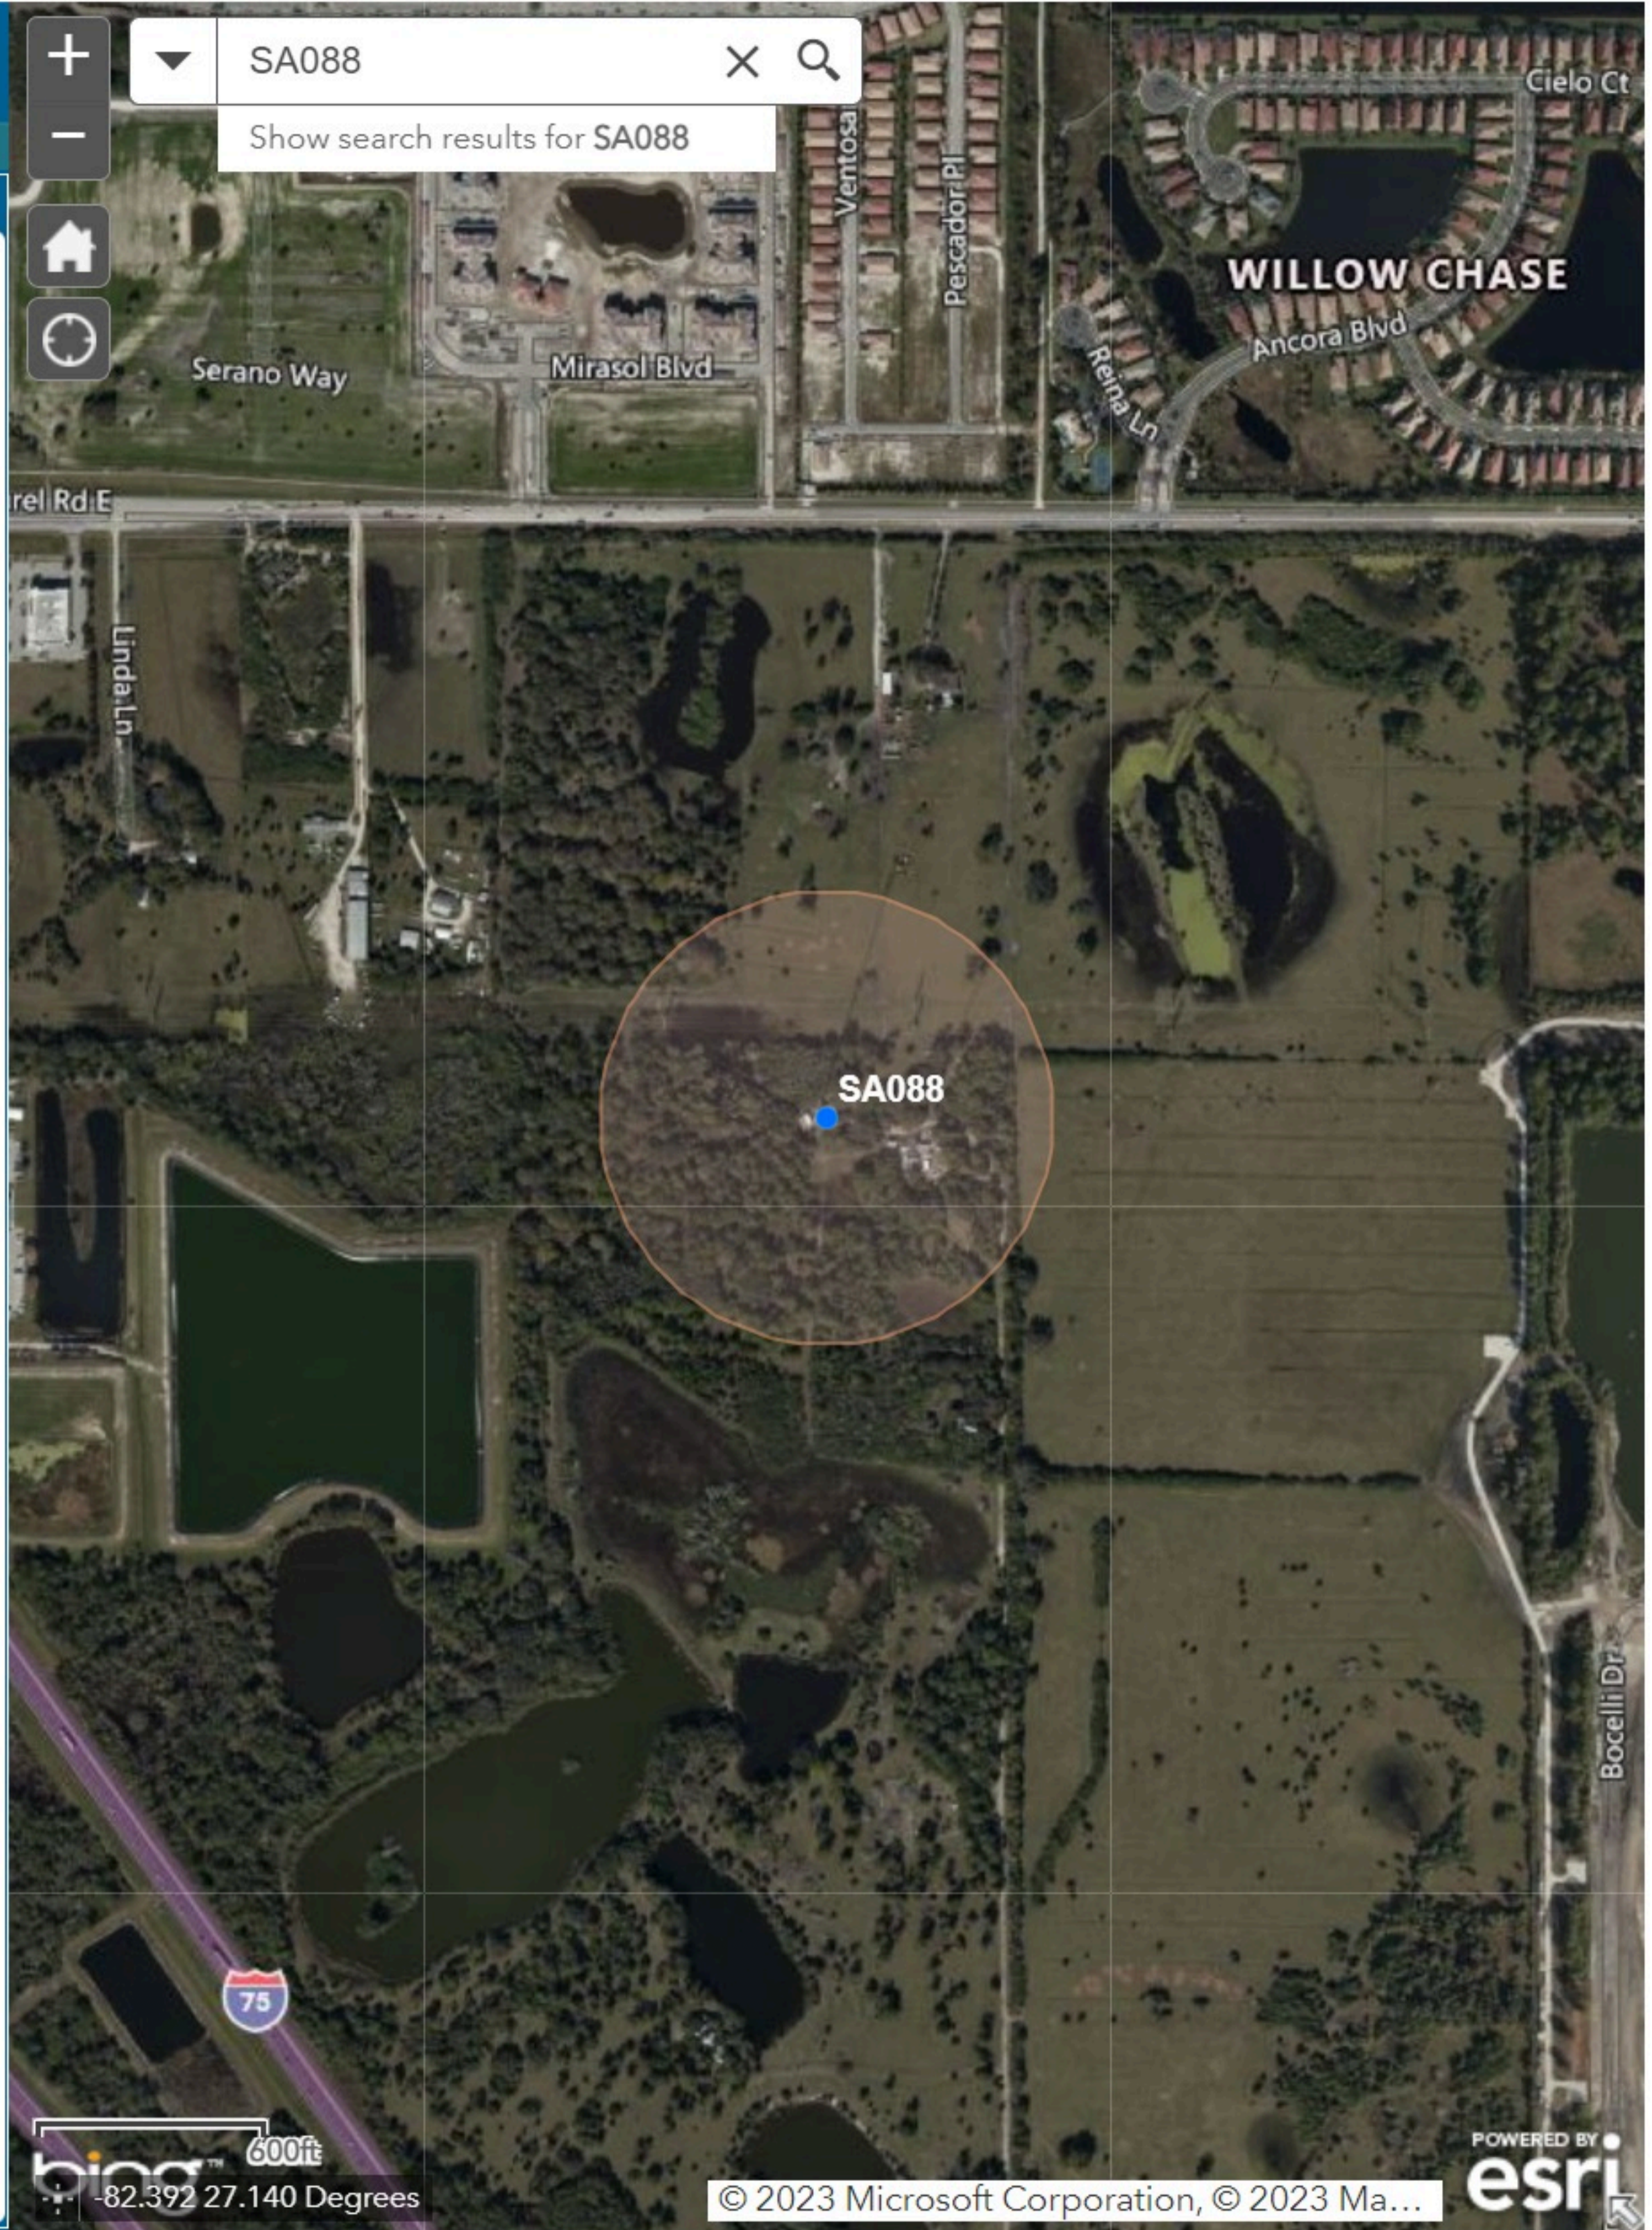

Richard Cordner
