Research provided to support the RSF 2 Venice City Code requirements for the proposed Gulf Harbor Estates

The planning and zoning department of the City of Venice did an analysis of the study area using RSF 2 and RSF 3 zones from both sides of Harbor Drive and excluded the RSF 1 zones on the west side of Harbor Drive. They arrived at an average lot size of 12,639 square feet.

The preliminary plat of the Gulf Harbor Estates shows 9 lots and only 5 lots meet the average lot size as calculated by the planning and zoning department. The following lots do not meet the average lot size as calculated by the planning and zoning department

Lot # 1	10,634 sq. ft.	fails to meet the average lot size of 12,639 sq. ft.	by	2,005 sq. ft.
Lot # 2	11,909 sq. ft.	" " " " " " " " " " " "	"	730 sq. ft.
Lot # 8	10,355 sq. ft.	" " " " " " " " " " " "	"	2,284 sq. ft.
Lot # 9	10,794 sq. ft.	" " " " " " " " " " " "	"	1,845 sq. ft.

Average Lot Size		
Entire Study Area	Study Area Excluding RSF -1 Lots	Proposed Preliminary Plat
16,017 sq. ft.	12,639 sq. ft.	12,991 sq. ft.

If you look at column three in the box titled Average Lot Size on page 8 of 12 of the Staff Report for Petition Number: 16-4PP Gulf Harbor Estates, also shown above, you will find that you could list Lot # 7 as not having the Proposed Preliminary Plat square footage as well.

Lot # 7 12,840 sq. ft. fails to meet the average lot size of 12,991 sq. ft. by 151 sq. ft.

So 4 or 5 lots out of 9 lots do not meet the Average Lot Size Study Area

The 2.68 acre parcel cannot be divided into 9 equal lots because of the shape of the parcel and the necessary frontage requirements to arrive at 12,991 sq. ft. per lot.

The entire area I researched (west side of Harbor Drive) as well as the study area used by the Planning and Zoning department including RSF 3 codes (east of Harbor Drive) shows that very few properties have less than 80 foot minimum frontage. You will find a few 75 foot frontages on Circle Drive. Please consider the citizens of Venice living in the study area and make your decision based on what is currently the standard 80 feet minimum frontage in our area.

I would like to see a maximum of 8 lots or less on this parcel. In keeping with the RSF 2 Venice City code requirements the size of the lots would increase and they would also meet the 80 foot minimum frontages. The increase would make the lots sizes more compatible with the area.

The other main issue is the amount of square footage being used up on each lot for drainage. Drainage at the rear of the properties takes 20 feet across the width of the lot and drainage at the front of the properties takes 15 feet across the width of the lot. Another 15 feet is a swale running the total length between the lots. Having a larger lot size would also benefit the community by reducing the number of 15 foot swales running the full length between each lot to 7 swales instead of 8 swales. So having lots with more square footage makes sense because so much square footage is being used for the drainage system alone. On page C -5 of the preliminary plat for the proposed Gulf Harbor Estates you will find

that the storm water management takes .34 acres. This is 12.6 percent of the total parcel square footage which amounts to 14,732 square feet out of the total of 116,919 square feet for the entire 2.68 acre parcel. The lots as proposed for the Gulf Harbor Estates are not stand alone lots. A home owners association will have to be formed because each lot is dependent on the other to maintain this elaborate drainage system.

SUMMARY

Frontage is a critical concern for maintaining property value. My submitted listing of all the RSF 2 properties on the west side of Harbor Drive show 80 foot minimum frontages on all 41 properties with the exception of one. The average frontage for the entire 41 properties equals 96.5 feet.

It is my request based on the information submitted to this Planning and Zoning board by me, Leora Nelson a resident of this community that the proposed Gulf Harbor Estates is made to comply with the RSF 2 Venice City code and not receive the RSF 3 Venice City code they are requesting.

I offer this solution: The developer accepts the RSF 2 Venice City code. The developer redraws the plat to show 8 lots which would meet the requirements for a RSF 2 Venice City code. This will increase the square footage of each lot and meet the 80 foot minimum frontage requirement for a RSF 2 Venice City code thereby increasing the value of each lot.

Average lot size calculation

This is a listing of all RSF 2 properties of the Gulf Shores Subdivision on the west side of Harbor Drive being in close proximity to the proposed Gulf Harbor Estates. The total of 41 lots were used for this calculation. Properties north of the proposed Gulf Harbor Estates included Sunset Drive properties. The properties south of the proposed Gulf Harbor Estates, include Gulf Drive, Shore Drive, Beach Drive, east side of Sunset Drive and the west side section of Harbor Drive between Gulf Drive and Beach Drive.

**Considerations for rezoning parcel id# 0178-09-0023 also known as Gulf Harbor Estates to
RSF 2 Venice Code
FRONTAGE FRONTAGE FRONTAGE
80 FOOT MINIMUM LOT WIDTH**

The City of Venice should consider changing the density requirement of 30 % to 35 % for RSF 2 Venice City code on this preliminary plat for the Gulf Harbor Estates, with the agreement that the developer will redo lots sizes and increase the frontage to the 80 foot minimum requirement. The plat would meet all the requirements of a RSF 2 Venice City code if this is done. Using the 80 foot minimum frontage requirements for this parcel would make 8 lots the maximum total on this parcel. The developer was given a preliminary exception for the required side walk on the west boundary of this parcel so why couldn't this request for an adjustment of the density from to 30 % to 35 % be made? This exception could be made in this case only.

Because it has been told that a mistake was made about the correct zoning on this parcel an exception could be made without jeopardizing the standards of our neighborhood.

This parcel has a RSF 2 Sarasota County code at the present time. The difference in the requirements for the RSF 2 Sarasota County code is the density. It is 35% for RSF 2 Sarasota County code and it's 30% for RSF 2 Venice City code. RSF 2 Minimum lot requirements of 10,000 square feet for RSF 2 Sarasota County code and RSF 2 Venice City code were the same until the year 2003. The RSF 2 Sarasota County code reduced its requirement from 10,000 square feet to the current 9,600 square feet in 2003. The minimum width (frontage) of a lot is 80 feet, the same for both RSF 2 Sarasota County code and RSF 2 Venice City code. This parcel 2.68 acre divided into 8 lots more than meets the 10,000 minimum lot size and will meet the 80 foot minimum frontage requirement.

Because the current RSF 2 Sarasota County code is the current situation right now and this code has a density requirement of 35% it should be honored in this case without having to change from the RSF 2 Sarasota County code to the RSF 3 Venice City code to accommodate the developer's proposed preliminary plat for Gulf Harbor Estates for smaller lots sizes and smaller frontages.

The RSF 2 Venice City code is the most compatible zoning code for our neighborhood.

I know that more lots means more money for the developer but the planning and zoning department for the City of Venice needs to put the property owners concerns for maintaining the value of our property as their top priority. Money is just as important to us as it is to the developer. Frontage is not just a minor issue it is the main issue. The main reason for the developer to want a RSF 3 Venice City code is because of the minimum frontage requirement of 75 feet, having the smaller width of 75 feet makes it possible for the parcel to be divided into 9 lots and not the 8 lots that a RSF 2 Venice City code would limit. Requiring the minimum 80 foot frontage in the neighborhood, and the key word here is minimum, must be upheld. Make this subdivision a RSF 2 Venice City code.

If it is a concern to the planning and zoning board that the developer has invested so much money in this project under questionable facts about zoning then by giving the above exception it would make it possible for the developer to add value to each lot and raise the cost per lot. The larger lots with a 35% density would be attractive to buyers wishing to build larger homes. This would be a great solution for all parties.

Petition for Zoning to City of Venice

I want the city of Venice to make the parcel id#: 0178-09-0023 known as Gulf Harbor Estates a RSF2 Venice city code and NOT a RSF3 Venice city code. If this parcel were to be zoned RSF3 It would allow smaller lots in square footage and frontage. Thereby reducing the value of the larger neighboring properties.

Single-Family Detached House

- b. *Conventional Subdivision.* A conventional subdivision only allows one single-family detached house per platted lot of record occupied by a single family and not to exceed the maximum density allowed by the zoning district or the future land use category, whichever is more restrictive. All conventional subdivisions in the RE and RSF Districts that exceed 30 acres in size shall incorporate a common neighborhood use and focal point within the development such as a park, play area, plaza, square, pavilion or other similar facility that can accommodate such activities as outdoor gatherings, neighborhood events, and picnicking. The focal point size shall be equal to at least one

- c. *Cluster Subdivision.* A cluster subdivision provides a minimum of 30 percent common open space, exclusive of individual lots, and allows those housing types specified in Section 6.5.3. when occupied by a single family. All cluster subdivisions shall incorporate a common neighborhood use and benefit focal point within the development such as a park, play area, plaza, square, pavilion or other similar facility that can accommodate such activities as outdoor gatherings, neighborhood events, and picnicking. The focal point size shall be equal to at least one percent of the gross area of the subdivision. The focal point shall contain at a minimum, a community use facility. The focal point shall be specified at the time of preliminary plan submittal. Where single-family detached housing occurs within a cluster subdivision, such housing shall meet the standards shown below. NOTE: For density limitations in cluster subdivisions, also see Section 6.2.3.

RSF-2

INTENT

The RSF districts are intended to be single-family residential areas of low density. The nature of the use of property is the same in all districts. Variation among the RSF-1, RSF-2, RSF-3 and RSF-4 districts is in requirements for lot area, width and certain yards. Certain structures and uses designed to serve governmental, educational, religious, noncommercial recreational and other immediate needs of such areas are permitted or are permissible as special exceptions within such districts. Maximum residential density in the RSF-2 district is 3.5 dwelling units per acre.

LOT REQUIREMENTS

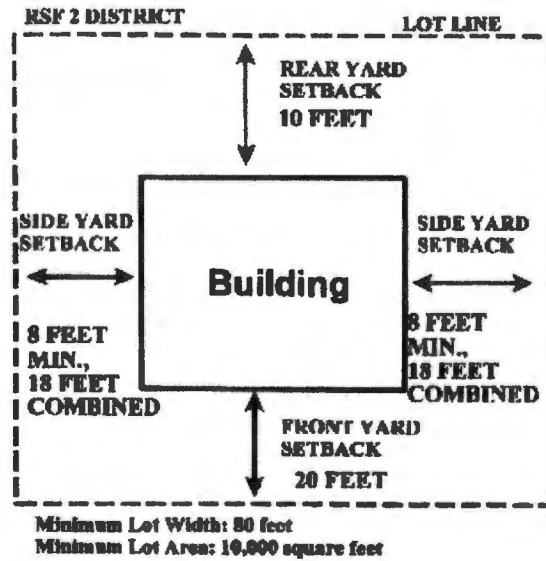

Minimum RSF-2 lot requirements:

- Width: 80 feet.
- Area: 10,000 square feet.

LOT COVERAGE

Maximum lot coverage by all buildings:

- Single-family dwellings and their accessory buildings: 30%.
- Cluster housing or townhouses: 30%.
- Other permitted or permissible buildings in connection with permitted or permissible uses, including accessory buildings: 25%.

YARD REQUIREMENTS

Minimum yard requirements:

Single-family dwellings:

- Front yard: 20 feet.
- Side yard: 8 feet minimum, but in no case less than 18 feet combined side yards.
- Rear: 10 feet

Cluster housing:

As for single-family dwellings, except that internal side yards are subject to the following: No minimum except that adjacent structures shall be separated by at least 20 feet.

Townhouses:

As for single-family dwellings, except that there is no minimum side yard.

Patio houses:

As for single-family dwellings, except for side yards, which must comply with the special exception standards for patio houses

MAXIMUM HEIGHT OF STRUCTURES

No portion of a structure shall exceed 35 feet in height.

RSF-3

INTENT

The RSF districts are intended to be single-family residential areas of low density. The nature of the use of property is the same in all districts. Variation among the RSF-1, RSF-2, RSF-3 and RSF-4 districts is in requirements for lot area, width and certain yards. Certain structures and uses designed to serve governmental, educational, religious, noncommercial recreational and other immediate needs of such areas are permitted or are permissible as special exceptions within such districts. Maximum residential density in the RSF-3 district is 4.5 dwelling units per acre.

LOT REQUIREMENTS

Minimum RSF-3 lot requirements:

- Width: 75 feet.
- Area: 7,500 square feet.

LOT COVERAGE

Maximum lot coverage by all buildings:

- Single-family dwellings and their accessory buildings: 35%.
- Cluster housing or townhouses: 30%.
- Other permitted or permissible buildings in connection with permitted or permissible uses, including accessory buildings: 25%.

YARD REQUIREMENTS

Minimum yard requirements:

Single-family dwellings:

- Front yard: 20 feet.
- Side yard: Six feet minimum, but in no case less than 15 feet combined side yards.
- Rear: 10 feet

Cluster housing:

As for single-family dwellings, except that internal side yards are subject to the following: No minimum except that adjacent structures shall be separated by at least 15 feet.

Townhouses:

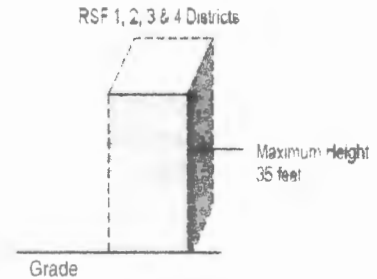

As for single-family dwellings, except that there is no minimum side yard.

Patio houses:

As for single-family dwellings, except for side yards, which must comply with the special exception standards for patio houses.

MAXIMUM HEIGHT OF STRUCTURES

No portion of a structure shall exceed 35 feet in height.

ADDITIONAL INFORMATION

This brochure provides general information concerning the RSF-3 district regulations but may not include all details. Drainage issue:

This project has a very involved system for draining the 2.68 acre parcel. The first major issue is the fact that there will be a 15 foot drainage ditch (swale) running between each lot (parcel) . So when you drive down Gulf Drive you will see an indentation covering a width of 15 feet between each property. So because this is such a unique piece of property with such an elaborate system for drainage it becomes even more important for each parcel to be larger in size to accommodate the swales surrounding the entire 2.68 acres. According to the submitted plans the drainage storm water management area covers .34 acres of the size of the total parcel which comes out to be over 12.5 percent of the whole project. What's even more worrisome is the fact that the system will be turned over to a Home Owners Association. The engineer on the project stated that this system is not at all common and will have bunches of swales instead of pond. Why wouldn't the City of Venice require the developer to provide a location that is already using this system before the City of Venice accepts the developer's plan. It looks good on paper but does it do the job. Why would we want the City of Venice to be the first to test this system and especially when you know that the property buyers (Home Owners Association) are going to be responsible for the system.

The second major issue with the drainage system is its proximity to Deertown Gully , the northern boundary of the 2.68 acre parcel. This outfall waterway is not free flowing and could be a real problem in the future because of the additional water coming from the drainage system into Deertown Gully. This waterway is in the high flood zone. So there could be problems with water inflow from the Gulf of Mexico in times of storm surges. Water will enter Deertown Gully from two planned drains. The water in Deertown Gully is supposed to flow into the Gulf of Mexico but backs up due to the buildup of sand dunes on the beach. The backup forms a small lake (pond). This is a serious situation because of stale water just sitting there. It could be a breeding ground for mosquito's and bacteria. The other concern is that in the staff report of March 7 they mentioned that the City of Venice is responsible for the maintenance of Deertown Gully not completely true. The area bordering the northern side of the 2.68 acres is maintained by the City of Venice but the Deertown Gully portion going from the planned Gulf Harbor Estates running westward is not maintain by the City of Venice at all. This portion from the southern boundary of the Gulf Harbor Estates going west is privately owned. The owners of the private properties are Manning to the north and owner Farley to the south.

The 18 interconnected swales around the perimeter of the 2.68 acre parcel pose a problem if the water does not permeate into the ground within the required 72 hour period. Mosquito's hatch within 24 to 48 hours so these swales could pose a health issue for the entire City of Venice. The possibility of pipes being clogged with tree roots is also a concern. Leafs blowing around the 2.68 acre parcel could cause clogging of the Deertown Gully. Leafs falling into Deertown Gully from the proposed Red Maple trees scheduled to be planted right along the top border of Deertown Gully could cause major problems at the western most end of the Gully, right on Venice City Beach . Leafs flowing into this area will cause backups at the beach. Because of shifting sands due to winds, tides and storms the Gully is seldom free flowing.

What does the developer mean when he says the drainage will be treated? Where and how?

Deertown Gully is the main northern drainage for the Venice City airport. Deertown Gully is also in the high flood zone. I have attached a copy of the flood map I received from the Venice City engineering department. I believe additional research needs to be done before this elaborate drainage system gets the go ahead.

ORDINANCE NO. 2004-16

AN ORDINANCE OF THE CITY OF VENICE, FLORIDA, ANNEXING CERTAIN LANDS LYING CONTIGUOUS TO THE CITY LIMITS, AS PETITIONED BY ROSEMARY FARLEY, AS TRUSTEE INTO THE CORPORATE LIMITS OF THE CITY OF VENICE, FLORIDA, AND REDEFINING THE BOUNDARY LINES OF THE CITY TO INCLUDE SAID ADDITIONS.

WHEREAS, The City Council of the city of Venice, Florida received a sworn Petition from Rosemary Farley dated February 24, 2004, requesting the city to annex a certain parcel of real estate herein described, owned by Rosemary Farley into the corporate limits of the city of Venice, Florida.

NOW, THEREFORE, BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF VENICE, FLORIDA:

SECTION 1. After its evaluation of all evidence presented, and in reliance upon representations made by Rosemary Farley in said petition, the city of Venice, acting by and through its City Council by the authority and under the provisions of the Municipal Charter of the city of Venice, and the laws of Florida, hereby annexes into the corporate limits of the city of Venice, Florida, and redefines the boundary lines of said city so as to include the following described parcel of real property in Sarasota County, Florida:

Beginning at the Southeast corner of Section 13, Township 39 South, Range 18 East, run thence N 89° 59' W 30.0 feet along the South boundary line of said Section 13; thence N 0° 18' E 771.4 feet parallel to the East boundary line of said Section 13 for a point of beginning; thence continue N 0° 18' E 268.9 feet to the southerly bank of Canal; thence S 72° 12' W along said southerly bank of Canal 624.5 feet; thence S 12° 50' E 131.4 feet; thence N 84° 56' E 566.2 feet to the point of beginning. All lying and being in the Southeast ¼ of the Southeast ¼ of Section 13, Township 39 South, Range 18 East, Sarasota County, Florida.

Sec. 86-60. - Official zoning atlas.

Code of Ordinances
CITY OF VENICE 1-26-17

- (a) *Establishment of districts; adoption of official zoning atlas.* The official zoning atlas of the city is hereby divided into zones or districts as shown on the official zoning atlas which, together with all explanatory matter thereon, is hereby adopted by reference and declared to be a part of this Code. The official zoning atlas shall be identified by the signature of the mayor and attested by the city clerk. It shall state: "This is to certify that as of the adoption of Ordinance No. _____ this is the official zoning atlas of the City of Venice, Florida" and shall state the date of the certification and bear the seal of the city.
- (b) *Unauthorized changes in official zoning atlas.* No changes of any nature shall be made in the official zoning atlas except in conformity with the procedures set forth in this chapter.
- (c) *Official zoning atlas to be final authority as to zoning status.* Regardless of the existence of purported copies of all or part of the official zoning atlas which may from time to time be made or published, the official zoning atlas, which shall be located in the office of the city clerk, shall be the final authority as to the current zoning status of all lands and waters in the city.
- (d) *Rules for interpretation of district boundaries.*
 - (1) *Uncertainty as to boundaries.* Where uncertainty exists as to the boundaries of districts as shown on the official zoning atlas, the following rules shall apply:
 - a. Boundaries indicated as approximately following the centerlines of streets or alleys shall be construed as following such centerlines as they exist on the ground, except where variation of actual location from mapped location would change the zoning status of a lot or parcel, in which case the boundary shall be interpreted in such a manner as to avoid changing the zoning status of any lot or parcel. In case of a street closure, the boundary shall be construed as remaining in its location except where ownership of the vacated street is divided other than at the center, in which case the boundary shall be construed as moving with the ownership.
 - b. Boundaries indicated as approximately following lot lines, public property lines and the like shall be construed as following such lines; provided, however, that, where such boundaries are adjacent to a street or alley and the zoning status of the street or alley is not indicated, the boundaries shall be construed as running to the middle of the street or alley. In the event of street or alley closure, interpretation shall be as provided in subsection (1)a, above.
 - c. Boundaries indicated as approximately following city limits shall be construed as following such city limits.
 - d. Boundaries indicated as following shorelines or centerlines of the Gulf of Mexico, bays, streams, canals, lakes or other bodies of water or indicated as following official bulkhead lines shall be construed as following such shorelines, centerlines or official bulkhead lines, except when an erosion control line is established in accordance with state law. In case of a natural change in shoreline, or of the course or extent of bodies of water, the boundaries shall be construed as moving with the change. In the case of changes in shoreline or of the course or extent of bodies of water made as a result of dredging or filling, the boundaries shall be constant, not moving with the change, and a zoning application review shall be required as provided herein.
 - e. Boundaries indicated as following physical features other than those mentioned in subsections (d)(1)a through d of this section shall be construed as following such physical features, except where variation of the actual location from the mapped location would change the zoning status of a lot or parcel, and in such case the boundary shall be interpreted in such manner as to avoid changing the zoning status of any lot or parcel.
 - f. Boundaries indicated as parallel to or extensions of features indicated in subsections (d)(1)a through e of this section shall be construed as being parallel to or extensions of such feature.

2 of 2

g. Distances not specifically indicated on the official zoning atlas shall be determined by the scale of the map.

(2) *Interpretation by zoning administrator.* In cases not covered by subsection (d)(1) of this section, the zoning administrator shall interpret the official zoning atlas in accord with the intent and purpose of this chapter. Appeal of an interpretation of the zoning administrator shall be to the planning commission.

(Ord. No. 2013-10, § 3, 5-28-13)

The attached 5 maps are of the parcel # 0178090023 owner Southbridge Investments LLC located in the City of Venice at the intersection of Harbor Drive and Gulf Drive. Proposed subdivision titled Gulf Harbor Estates clearly shows the property to be RSF 2 Sarasota County code.

The first copy of the attached maps came from the City of Venice planning and zoning department. They use a system called Laserfiche. The map has a date stamp of 3-8-2017 on the bottom right hand corner. This date is the very day after the planning commission met on the Petition Number 16-4PP Gulf Harbor Estates.

I have spent my time doing the research on this property and I uncovered many different forms of maps from the City of Venice and also Sarasota County that lead me to believe that the developer of the proposed subdivision Gulf Harbor Estates did not do their due diligence.

They have said repeatedly "No Fault of their own". If they had not just relayed on a map on the wall in the City of Venice planning and zoning department but had done their due diligence this situation would not have occurred. I believe going to the Sarasota County Courthouse would be one of the first things a developer would do to get the lay of the land in the county in which they are planning their project. If they had gone to the Sarasota County Courthouse they would have discovered at that time the discrepancy with the RSF codes between the City of Venice information and the Sarasota County information on this parcel # 0178090023. They then could have brought it to the attention of the City of Venice and other avenues beside just the map on the wall would have been pursued.

One of the first things the planning and zoning should have done in my opinion would have been to check the annexation papers for this parcel. The annexations records are obtained in this office.
