Subject: I-75 and Laurel Interchange

Dear Commissioner Barbetta,

The I-75/Laurel Road interchange is an important gateway for people entering the wonderful Venice community we call home. It is essential that this entryway reflect the beauty and vitality of our community: for families that choose to live here, for businesses that sustain our economy, and for visitors that are drawn here.

I understand that there is a FDOT program that has funds to beautify I-75 interchanges. A beautification project to improve this interchange would be a solid investment in our region.

Here at Gulf Coast Community Foundation, we care deeply about this community and fully support any efforts to landscape and beautify this area.

Warmest regards,
Teri
