Codes				
PRF	Preferred species			
CS	Cold Sensitive - Will need protection from cold if planted away from the coastal areas			
M	Can be Messy			
WR*	Has shown good Wind Resistance when properly pruned and given adequate root space			
LA	Limited Availabilaty in the comercial trade - may have to go to a specialty nursery or outside the region			
FLW	Flowering tree - produces a showy flower			
* Wind Resistance (WR) refers to a species' natural wood strength, branch structure, and rooting habits. Proper planting practices, good nursery stock, and irrigation practices play a large roll in a tree's ability to withstand high winds.
