Hello David

Sorry for the delay I'm just getting back into the office. I will be able to attend the meeting on February 27th.

The Mini Reef is \$250.00 including delivery and installation. The ideal placement for units is in canal systems under docks, IC waterways under docks and piers as well as open bays as long as the bay is sheltered from wave action coming in from the Gulf. I will attach a couple documents from Dr. McGarity from Florida Southwestern State College who has been evaluating the water chemistry around our Reefs.

Please don't hesitate to contact me at the number below if you need a more detailed explanation of any of this information. Looking forward to meeting you in February.

Subject: Mini Reefs

Good afternoon David.

You & I emailed back and forth a few weeks ago concerning questions I had WRT the Mini Reefs and possible installation, costs, etc.

I presented some information to the Venice, FL Environmental Advisory Board - of which I am a member - and have been asked to obtain further information from you regarding the following : costs; any reports detailing analysis for effectiveness, ideal location / placements and any other information which may assist us in evaluation of these items in water bodies in Venice.

We would also like to extend an invitation to you to attend our 27 February 2019 meeting at Venice City Hall. The meeting begins at 1pm.

If you are able to attend could you please email Lori and Adriana so they can schedule you on the agenda and then also email them any documents to be distributed to the members?

Thank-you. Merry Christmas !

David M. Stone
