EDUCATION: Purdue University - Bachelor of Science Building Construction and Contracting

CERTIFICATIONS: Ohio EPA Class III Wastewater Operator (WW3-1118954-14)

WORK EXPERIENCE:

November 16, 2009 – Present

**Akron Public Utilities Bureau – Water Reclamation Services  
Engineering Projects Coordinator**

Responsible for coordinating all phases of Water Reclamation Facility projects with Construction Management Team and the operation of the existing facilities during construction. Assisted Plant Engineer with troubleshooting plant operations and designing plant improvements. Provided technical assistance to Maintenance Foreman. Conducted pilot projects and studies.

Major Projects completed as part of a Combined Sewer Consent Decree:

**Step Feed Phase 1**

Converted one of six activated sludge treatment trains to operate in step feed mode during wet weather. This increased the secondary treatment capacity from 110 MGD to 132 MGD, proving step feed modes worked as designed.

**Step Feed Phase 2**

Converted remaining five activated sludge treatment trains to operate in step feed mode during wet weather. This increased secondary treatment capacity from 132 MGD to 220 MGD.

**BioCEPT**

Constructed a 10 million gallon chemically enhanced primary treatment system with return activated sludge for biological treatment. Effluent from the system is comparable to secondary effluent. The system can treat 60 MGD assuring all flows into the Water Reclamation Facility receive secondary or comparable treatment.

**Headworks**

Constructed a new Screenings facility with 4 continuous raked bar screens rated at 93.7 MGD each replacing 4 screens rated at 70 MGD ea providing n+1 redundancy. Constructed 4 55' diameter Detritors replacing 4 40' diameter Detritors providing adequate grit removal for maximum plant flows of 280 MGD. Project was constructed straddling existing trunk line sewer into the plant keeping existing Headworks in service

during construction. Project also constructed new ariel river crossing of the trunkline sewer over a river into the plant. This work required a bypass pumping system capable of pumping 280 MGD.

September 20, 2005 – November 16, 2009

**Akron Engineering Bureau  
Engineering Projects Coordinator**

Responsible for administering construction contracts including supervision of on-site project representatives. Insured contract requirements were met. Projects included numerous ODOT LPA projects.

May 18, 1992 – September 20, 2005

**Akron Engineering Bureau  
Engineering Technician I, Engineering Technician II, Engineering Technician III**

Resident Project Representative on construction projects including roadway, sewer, force main, treatment plant, pump station and architectural projects. Increasing responsibilities included compiling project records and documentation and acting as a liaison between the City and the public including residents and business owners.

May 1988- May 1992

**Laborers International Union of North America  
Union Laborer**

Construction laborer on sewage treatment plant, pump station, gravity and force main sewer projects for various contractors including The Dick Corporation, Thompson Construction, Indiana Construction, and Adamo.

August 1990-May 1992

**Payless Cashways / Furrows  
Estimator**

Completed plan take offs and provided customers with building material quotes for projects including houses, apartment building, and storage structures.

## Interests & Experiences

Are you currently serving on a city board or commission?

☐ Yes ☒ No

Have you ever served on a city board or commission?

☐ Yes ☒ No

Why are you interested in serving on a board or commission?

As a landscape designer and amateur historian I have a special appreciation for John Noland's planned community of Venice. Since coming to Venice I have enjoyed the bike trail and the many parks, pocket parks and especially West Blaylock Park. I believe I have a wealth of relevant experience that would provide a positive contribution to the Department of Parks and Recreation. Please review my relative experience in the attached resume.

### Resume of Education and Experience:

University of Kansas, Business Administration. 35 years in the health care industry designing, manufacturing and marketing medical devices. The past 10 years I have been retained as a landscape designer, now working remotely, for Highland Green Nursery in Grayslake, IL.

### Member of the Following Organizations:

Grace United Methodist Church

**rickliesmann@gmail.com**

**Objective:** To fill the unexpired term and serve on the Parks and Recreation Advisory Board through August 31, 2025 or a new term with the Environmental Advisory Board.

**Relative Experience:** As a landscape designer I have created outdoor spaces that showcase native plants and grasses combined with ornamental flora as well as trees that have a positive environmental contribution while reducing the area’s heat island effect. Awareness of natural contours and gradients, outdoor spaces can be created that accentuate natural beauty while mitigating unnecessary erosion or displacement of existing soils.

I have combined hardscape elements and natural landscape to create an aesthetic appeal with functional design. In designing residential or municipal playgrounds I have incorporated amusing elements that have visual appeal and are always designed to maximize safety.

I have specified permeable surface materials that are now being used in many municipalities. It appears new segments of the walkway in Heritage Park are using permeable materials on the asphalt walk.

Living on Venice Island close to the beach I have experienced the beauty of a Nolan planned community dedicated to beauty and common spaces. I believe in preserving this original design while expanding recreational opportunities and common green spaces.

I believe my experience would allow me to contribute to the City of Venice and the Parks and Recreation Department or Environmental Department as a member of the Advisory Board

### **Community Activity and Memberships**

#### **Volunteer, Grace United Methodist Church, Venice, FL**

- Responsible for managing the implementation of a new software management system
- Design workflows, database search criteria and assign tasks to staff
- Create and train volunteer groups
