- (b) Potable water, irrigation water, and reclaimed water service tap fees are designated by a short service or long service tap. Generally, a short service is one where the service location is on the same side of the street as the water main to be tapped in order to provide the service, and a long service is where the water main is not on the same side of the street. It is recognized that site conditions may vary, and may include accessibility, constructability, labor or material requirements, or other conditions that may pose tap construction challenges in excess of those incurred for typical short services. The utilities department makes this determination based upon actual site conditions.

**SECTION 3.** Chapter 74, Utilities, Article I, In General, Section 74-11, Water, sewer and reclaimed water rates, is amended as follows:

**Sec. 74-11. - Water, sewer and reclaimed water rates.**

- (a) *Schedule of charges.* There is hereby established the following schedule of charges for the use, or reasonable availability for use, of the services of the city water and wastewater system. The monthly readiness for service charge is for the reasonable availability for the use of the system and shall be due regardless of whether the system is actually used and/or property is occupied.
