

# MANAGER'S REPORT AGENDA ITEM REQUEST FINANCE DEPARTMENT

---

**TO:** Ed Lavallee, City Manager *EL*  
**THRU:** Jeff Snyder, Finance Director *JS*  
**FROM:** Jon Mayes, Procurement Specialist *JM*  
**DATE:** June 19, 2014  
**SUBJECT:** Request to purchase one (1) truck- a "Vac-Con Sewer Combination Cleaner Body on a Freightliner chassis."

---

## **Background:**

We are seeking approval of the Mayor and City Council to utilize a cooperative purchasing agreement to purchase one (1) truck off of the Florida Sheriff's Association's bid (# 13-11-0904).

This truck is a 2014 Vac-Con Sewer Combination Cleaner Body with an 11 yard debris tank on a 2014 Freightliner chassis. **This truck is needed and will replace older Unit # 225, a 2000 Sterling "Vactor" truck. This older unit will be taken out of service and sent to the vehicle auction. Please see the attached report from fleet maintenance stating replacement justification.** The final total price is \$390,311.64- \$335,311.64 for the cleaner body and chassis and \$55,000.00 for the maintenance plan. The Utilities Department has \$336,795.00 budgeted for this truck and \$55,000.00 for the maintenance plan. This purchase was detailed in the 2013-2014 Fiscal Year Adopted Budget.

This request is made in concurrence with Len Bramble, Utilities Director and James (Mickey) Healey, Field Operations Supervisor- Utilities Department.

## **Requested Action:**

We therefore are requesting that City Council approve the purchase of this vehicle from the Florida Sheriff's Association bid (# 13-11-0904).

**City Attorney Review:** N/A

**Risk Management Review:** N/A

**Funds Availability:** Funds appropriated in department account for budget year 2013-2014

# AMERICAN IMPORT AUTO FLEET DIVISION

June 16, 2014

To whom it may concern,

At the request of the Utilities Dept. we inspected Unit # 225, the 2000 Sterling Vactor Truck. During the inspection it was noted that the main tank has rust and is beginning to deteriorate in areas near mounts and plates. Several rust holes have already been repaired. The main inlet tube is leaking again due to the amount of sand and debris that the Unit is picking up. This sand gets into the seals and breaks them down, causing it to leak down the front of the cab of the truck. Taking into consideration the above items, the use, importance and the mileage and condition of this vehicle along with age and condition of the electronic controls for the vacuum system, we recommend that this vehicle be considered for replacement .

If you have any questions, please let me know.

Mark Micalizzi

Fleet Service Manager,

American Import Auto
