Subject: Lake UtilitiesWellfield Park.....3rd Request

This is the City Of Venice Utilities land at Wellfield . You and I visited this flooded area when these pictures were taken last year.

Our Utilities floods the soccer field, park road, and other park land.

I requested a plan to control this water out of the Park property.

As you know we had a complete park and Utilities land survey.

We are still waiting for a flood control plan of action to keep this water out of the park. After several requeststill no plan from Utilities.

This issue has nothing to do with any action on any parks plan.

This land belongs to Utilities and its flooding onto parks fields is a city Utilities problem and costs.

This is another disappointing Utilities Issue for our citizens.

Lori, please place on the August council meeting agenda under old business.....unresolved.
