**Subject:** AGENDA ITEM FOR OCTOBER 25

Lori, I would like to discuss with council the possibility for our Utilities department to develop a presentation for Council and other committees such as the Environmental Advisory Board.

Topics such as the water processing and the East side sewer and reclaimed process.  
How we have come from wooden water lines to the PVC lines currently being installed.  
The many improvements in the area of East Gate and other parts of the city.

Topics may also include the challenges the city will face in the future with growth and the types and frequency of testing that maybe required to keep our citizens safe. The most recent Mozaic problem is just one example that the city may need to develop procedures to handle.

Possibly this could be accomplished sometime in 2017.

Travel Safe  
Fred
