Project Number:

FY19 Estimated Start Date: FY19 Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Financially Sound City

Description/ Justification:

This is to install electronic tank reporting such as warning alarms and capacity levels at nine fuel tanks under the city's care . There will also be installation of a Fuel Key reader at each location to track all usage going into vehicles. The software will be to install and implement a Fleet PO system and the ability to track service and cost. We will also have the built in ability for future additions to the software such as parts, fleet pool, and labor

Project Title: New Vehicle - ATV

Project Number:

Estimated Start Date: Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Financially Sound City

Description/ Justification:

> A 2 seat ATV for the Parks Division would be utilized as a sprayer unit to control weeds and to transport tools to remote areas in parks. This would save wear and tear on trucks and other equipment being used now.

Project Title: Conduit Space Recovery

Project Number:

NA

Estimated Start Date:

10/1/2018

Estimated Completion Date: 9/30/2019

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Expand Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

This project is to recover space in the City's fiber optic conduit that runs under the Intra coastal waterway. MaxSpace is a no-dig conduit space recovery solution designed to safely remove rigid innerduct from around active fiber cables with little to no load on the cable and no interruption of service.

Project Title:

Police Vehicle Replacements

Project Number:

TBD

Estimated Start Date:

FY19

Estimated Completion Date: FY19

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

In order to practice fiscal management, patrol vehicles should be replaced when over the 80,000 mile benchmark. Although mileage is used as a standard, it is not an accurate depiction of correct operating time. Police vehicles have twice the operating time as civilian cars. Seven of the listed vehicles are to replace existing police department vehicles in fiscal year 2019. These vehicles will be at the end of their mechanical life and would be cost prohibited to keep. One vehicle is too add an additional Police Service Aid Vehicle. Included in the purchase are 3 patrol vehicles: vehicle/graphics/radio/emergency equipment/video camera, 2 unmarked vehicles: vehicle/radio/emergency equipment, PSA vehicle: vehicle/radio/emergency 1 equipment, 1 crime scene vehicle: vehicle/radio/equipment and 1 speed sign.

Description/ Justification:

The need for a Skid Steer Loader was made known during hurricane Irma. Public Works rented one and realized the value of the unit when doing clean up jobs in tight areas. The unit also the ability to add attachments such as a broom for cleaning parking lots, street curbs and parking lots, and a claw to move brush or debris. This can also help grade small areas and be used by Parks and Storm water as well when needed. The request for an additional truck is due to added growth in the Maintenance department.

FY19 **Estimated Start Date:** Estimated Completion Date: FY19

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Financially Sound City

Description/ Justification:

Replace unit 414 a 1985 20 ton tandem axel dump truck. Unit will be replace with a 10 ton that will be more versatile in the city and have a lower operating cost. Current unit is well past APWA standards and has shown maintenance cost related with a heavy truck of this age. Replace Unit 439 a 1994 bucket lift truck that has been removed from service due to large repair cost and failure. Replace unit 430 a cargo van that is starting to shows heavy use and wear and is also past AWPA standards for replacement.

Project Title: Replacement Vehicles

Project Number:

Estimated Start Date: <u>FY19</u> FY19 **Estimated Completion Date:**

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Financially Sound City

Description/ Justification:

Replace units 151 and 155 fire support vehicles. Both are past the APWA standards for age. They will be replaced by newer, safer, efficient, and more reliable units that are needed in the event of an emergency situation. The one unit is shared with the Building Department and used for inspections with the Fire Department. The other is used to pull the Fire boat and other emergency response trailered equipment. These truck will see multiple use and may be used in emergencies and need to be within industry standards. Replace Fire Engine 154 to keep apparatus in safe operating age.

Project Title: Fire Station 51 Reconstruction

Project Number:

Estimated Start Date:

FY 19

Estimated Completion Date: FY 23

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Funds are requested for constructing a new Fire Station 51. It is recomended to borrow funds and use one cent sales tax to pay off the debt over time. Some portion of the cost of the project may be eligible for funding by Fire Impact Fees. Note that the Facility Condition Assessment report indicated the 5 year maintenance needs for the existing building were more than \$500,000.

Project Title: City Hall Parking Lot Resurfacing

Project Number: TBD

<u>19-Mar</u> **Estimated Start Date:** 19-Aug. **Estimated Completion Date:**

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

This project is to resurface and restripe the existing City Hall asphalt parking area, upgrade the existing curb ramps and provide better accesibilty to this public facility. The existing asphalt is distressed and needs to be resurfaced in order to avoid increased integrity issues. Additionally, the existing curb ramps need to be upgraded to meet current ADA compliance standards for this public facilty. The project design will be performed in-house by the Engineering Dept.

Project Title:

Playgrounds Maintenance

Project Number:

Estimated Start Date: FY 20 FY 22 **Estimated Completion Date:**

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Financially Sound City

Description/ Justification:

The city has playgrounds in 11 parks, with more than 60 individual pieces of equipment and a total value in 2017 of more than \$400,000. As the equipment ages it can be damaged to the point where it is unsafe and cannot be repaired. Some of the smaller pieces are replaced out of operating funds, but the larger structures cost \$20,000 or more. It is anticipated based on past experience that one or two of these large structures must be replaced every 5 years.

Department/Division: **Engineering** City Engineer Contact Person:

Project Title: Tarpon Center Drive Bike Lanes

Project Number: <u>TBD</u>

Estimated Start Date: <u>18-Nov</u> Estimated Completion Date: <u>19-Sep</u>

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

This project is to restripe Tarpon Center Dr. from The Esplanade N. to the South Jetty to include 2 wider traffic lanes and a buffered 7-8 ft. bike lane (similar to Harbor Dr. S.). The existing 4 traffic lanes are too narrow to properly navigate the turning radii and 4 lanes are unnecessary for this low volume roadway. This roadway experiences heavy bicycle traffic and a buffered bicycle lane would improve the safety of this corridor.

Project Title:

4-Box LED PAPI & Lighted Wind Cone

Project Number:

Estimated Start Date:

FY 2019

Estimated Completion Date:

FY 2021

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Design, Permit and Construct replacement of the PAPIs with a 4-Box LED model, install lighted wind cone, and replace constant current regulator on Taxiway (TXY) B. Since 2012, the Airport has spent > \$22,000 replacing incandescent PAPI bulbs. Replacement of existing 2box PAPIs with new 4-Box LED systems on Runway (RWY) 5-23 will result in substantial energy savings, reduce maintenance costs and improve system reliability. This box is also specified for runways serving jet aircraft in accordiance with FAA AC 150/5340-30H. RWY 5-23 does not have lighted wind cone, therefore, this will increase safety. Constant current regulator or TWY B is > 30 years old. Replacing it will improve safety, reliability and energy efficiency.

Construct Parallel Taxiway D

Project Number:

Estimated Start Date:

FY 2019

Estimated Completion Date: FY 2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

DESIGN PARALLEL TAXIWAY D

Description/ Justification:

Construct full-length parallel Taxiway (TWY) D and update the ALP with the ability to upload to FAA's AGIS web portal. This project will allow aircraft to exit primary Runway (RWY) 13-31 faster, reducing runway occupancy time and increasing safety for larger aircraft arriving on RWY 31. This project will eliminate taxiing on RWY 13-31 and will keep larger aircraft accessing north side of airfield from utilizing TWY C, which primarily accomodates smaller aircraft accessing the hangar area.

MHP Pave Pine Road & Pine Street

Project Number:

AP0040

Estimated Start Date:

FY 2019

Estimated Completion Date:

FY 2019

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

•

Description/ Justification:

Mill and overlay pavement. Install new base material as needed. Install pavement markings. The roads were last paved in 1992. They are in poor condition with significant cracking, crumbling edges and areas of settling. A 2014 report prepared by Stantec for the Engineering Department recommended that the road be rehabilitated in 2015.

Project Title: MHP - Replace Electric Pedestals

Project Number: AP0044

FY 2019 **Estimated Start Date:** Estimated Completion Date: FY 2021

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

The electric pedestals at the Venice Municipal Mobile Home Park are in poor condition. New replacement breakers are no longer available, so refurbished parts must be used when they need to be replaced. It is anticipated that the refurbished parts supply will be exhausted within the next few years.

Mark Cervasio **Contact Person: Project Title:** Wildlife & Security Fencing

Project Number:

FY 2022 **Estimated Start Date: Estimated Completion Date:** FY 2024

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Design, permit and construct approximately 6,000 LF of safety, wildlife, and security fencing along the airport perimeter that does not currently have barb wire or a wildlife deterrent in place. This new perimeter fence is needed to reduce the incursion of wildlife onto runways and taxiways. A field evaluation found numerous holes burrowed under the existing perimeter fence, and scat found on the runways. This project will improve safety in accordance with FAA Advisory Circular 150/5200-33B.

Airport

Project Title:

Design & Rejuvenate Runway 13-31

Project Number:

Estimated Start Date:

FY 2023

Estimated Completion Date:

FY 2024

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

Design and permit rejuvenation of 17-year old runway, including new markings. In accordance with FAA grant assurances, the airport is required to establish a pavement maintenance program. Additionally, the FDOT completed a pavement inspection in 2015, which recommends surface treatment of pavements as described in FAA AC 150/5370-10G. Pavement was last rebabilitated in 2006 and rejuvenated in 2016.

Project Title: Aquifer Storage and Recovery Well

Project Number:

Estimated Start Date:

10/1/2020 9/30/2022

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Estimated Completion Date:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

•

Description/ Justification:

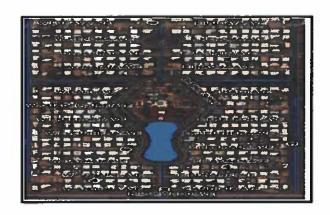

As we move into the future and have an increased demand for reclaimed water, it will be imperative that we have more storage capability. The addition of an Aquifer Storage and Recovery (ASR) well will allow for storing up to 2 MGD of reclaimed water during the wet season and recovering a similar amount for use during the dry season.

Estimated Start Date:

10/1/2018

Estimated Completion Date: 9/30/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

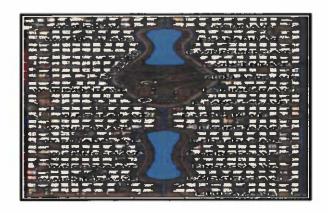

Description/ Justification: Replace old failing gravity collection system piping and relocate to front of properties. Relocate old rear easement water mains and water meters to the front of properties. Improve flow characteristics in an identified problem area. Reduce sanitary sewer overflows which is an objective of the Wastewater Master Plan and a regulatory requirement. Relocate inaccessable rear easement water and sewer lines to allow for proper maintenance and repair, providing for improved water pressure and flows (Antingua Ave. to north side of Lucaya Ave.)

Project Title: Booster Station (New) - Ajax Property

Project Number:

10/1/2017 **Estimated Start Date:** 9/30/2019 **Estimated Completion Date:**

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

The RO plant can pump water from this facility to the distribution system in order to boost pressure for peak demand and to maintain fire protection to the NE portion of the City. The current facility has out of date equipment and does not have the capability to efficiently regulate flows remotely; moving and replacing the facility will improve personnel productivity time, save operation costs, improve the distribution of potable water, water pressures and fire flows. This project would include the addition of a chemical system to help maintain chlorine residulals in the area and installation of remote pressure sensors in the system which allows for more efficient monitoring of the utility system. Another part of this project would include a new emergency interconnect with Sarasota County.

Project Title: CO2 Bulk Tank Replacement

Project Number:

Estimated Start Date:

4/1/2019

6/1/2019 Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

▼ Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

CO2 bulk tank is used to supply gas which in turn is used to lower the pH of the permeate water before it enters the degassification process. The bulk system consists of a pressurized bulk tank and a chiller unit to control the temperature of the gas. This system is over 15 years old and has reached the end of its useful life and ,as it is a high pressure unit, should be replaced for safety reasons. Electrical and controls are also no longer in compliance with codes. System is critical to the City's drinking water treatement system.

Project Title: Corrosion Inhibitor Bulk Tank Replace

Project Number:

Estimated Start Date:

4/1/2021

Estimated Completion Date: 5/1/2021

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

•

Description/ Justification:

Bulk tank is a 2,300 polypropaline tank used to store zinc orthophosphate used as a corrosion inhibitor in the finished water pumped to the City's utility customers, to protect metal pipes and fittings from corrosion. This chemical is acidic in its bulk form and given that the tank is over 10 years old, it has reached the end of its useful life after constant exposure to this chemical and sunlight.

Strategic Pian Goal: Upgrade City Infrastructure & Facilities

Description/ Justification: Replace old failing gravity collection system piping and relocate to front of properties. Relocate old rear easement water mains to the front of properties. Improve flow characteristics in an identified problem area. Reduce sanitary sewer overflows which is an objective of the Wastewater Master Plan and a regulatory requirement. Relocate inaccessable rear easement water and sewer lines to allow for proper maintenance and repair, providing for improved water pressure and flows. Design in FY 2018 and construction in FY 2019.

Department/Division: **Utilities / Field Operatins**

Contact Person: Mickey Healy Project Title: Force Main Replacements

Project Number:

10/1/2018 **Estimated Start Date:** Estimated Completion Date: Continuous

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Force main improvements consisting of upsizing existing wastewater force mains. Upsizing of force mains will alleviate surcharged conditions within the wastewater collection system minimizing the possibility of sewer backups and allow the wastewater pumping system to operate in a more efficient and cost effective manner by reducing electrical costs. The need to upsize shall be evaluated in 2016 after I & I improvements and lift station pump replacement is completed.

Project Title: Manhole Coating Replacement

Project Number:

Estimated Start Date: Estimated Completion Date:

continuous continuous

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

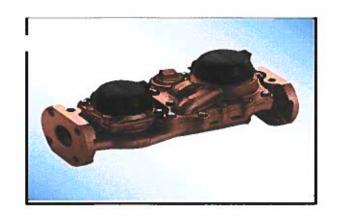

Replace existing interior coating with calcium aluminate seal coating. To reduce infiltration and protect the manhole structure from hydrogen sulfide degradation as recommended in the wastewater master plan. The replacements will decrease flows resulting in lower pumping and treatment costs, and will also decrease the possibility of pipe failure.

Project Title: Meter (Large) Change Out Program

Project Number:

Estimated Start Date:

10/1/2017

Estimated Completion Date: continuous

Relationship to Community Vision and City Council Strategic Goals

investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

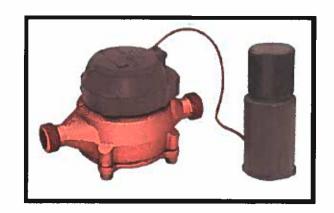

This will establish an ongoing replacement program to replace and refresh the mechanical and electronics of our existing water meter inventory (1 1/2" and above). The replacements will help improve accuracy of aging meters that wear out mechanically and update the technology of automatic meter reading (one way radio communications (AMR)) to that of advanced metering infrastructure (two way radio communications (AMI)).

Department/Division: **Utilities / Water Production**

Contact Person: Jim Anderson Project Title: Outfall Compositor, Sampler

Project Number:

2/1/2019 **Estimated Start Date:** 3/30/2019 Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Required Regulatory

-

Description/ Justification:

The Water Production seeks to replace it's aging remote site compost sampler. The Compositor is used to take timed samples, over a 24 hour period, each month. This testing is required by permit with the Department of Environmental Regulation on the concentrate from the Reverse Osmosis Water Treatement plant before it enters the Intra-Coastal waterway to ensure that the city isn't causing a negative impact on the receiving waterbody. The current unit is over 12 years old and has reached the end of it's useful life. While well maintained we have experienced functional issues with the current unit that risks our permit. The cost of the new unit includes an ongoing annual service contract to keep the equipment in compliance.

Project Title: Parkson Aqua Gard Screens

Project Number:

10/1/2018 **Estimated Start Date:** Estimated Completion Date: 9/30/2019

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

The two (2) existing bar screens typically run continuously and are due for replacement. The third screen will allow a rotation to be set up allowing one (1) screen to be off line during normal operation and/or maintenance. Additionally, it will be put on line during heavy rain events in lieu of the current manual bar screen which allows large debris to pass through to the new grit system causing it to plug up.

Project Title: Phase II RO CIP System

Project Number:

Estimated Start Date: Estimated Completion Date:

10/1/2019 3/31/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

System is used to perform chemical cleanings on the reverse osmosis skids used to treat the City's drinking water. At least twice each year the membranes require cleaning to keep them running as efficienctly as possible. The current system is over 25 years old and the tanks and pumps have well exceeded their useful life. This project will replace both poly chemical tanks, pump and electronic parts.

Project Title: Reclaimed Water Storage Tank Conver

Project Number:

10/1/2018 **Estimated Start Date:** 9/30/2020 Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

The existing potable ground storage tank to be converted for use as a reclaimed water storage tank. All necessary piping changes shall be included. Use of reclaimed water is based on demand and the amount of storage available. More storage is required for reclaimed water during times of low demand so it is available for times of high demand and for the City to have the ability to serve existing and imminent future customers.

Project Title: RO Membrane Replacement

Project Number:

Estimated Start Date:

5/1/2021

Estimated Completion Date:

7/1/2021

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

Project is to replace the membranes for the City's four reverse osmosis water treatment units. These units are critical for the treatment of the City's drinking water. The current membranes have reached the end of their typical lifecycle which is 5 to 7 years. Current membranes were installed in late 2014. This task will include the purchase and installation of 216 membranes per skid or 864 total membranes.

Project Title: Second Force Main Under I-75

Project Number:

Estimated Start Date: Estimated Completion Date:

10/1/2018 8/31/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

-

Description/ Justification:

Construct a new HDPE wastewater force main under I-75 via directional drill. No redundant crossing exists to transfer the majority of the City's flow to the WRF. As stated in the City's wastewater master plan, should the existing 20 inch force main fail and/or require maintenance, this wastewater flow to the Eastside WRF would be cut off. A 24 inch force main is recommended for system reliability, and it would lower the peak velocities improving the overall operation of the system.

Project Title: Sewer Replacement Program

Project Number:

Estimated Start Date:

continuous

Estimated Completion Date: continuous

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification: Replace damaged gravity sewer piping using cured in place, excavation or sectional lining pipe technology. A pipe assessment and certification program inspection and analysis identified damaged gravity sewer mains to be replaced by excavation methodology. These pipes were not able to be restored to operating condition via excavation and pipe replacement as recommended by the wastewater master plan. The replacements will decrease flows resulting in lower pumping and treatment costs, and will also decrease the possibility of pipe failure.

Project Title: Sodium Hypochlorite Tank Replace

Project Number:

Estimated Start Date: Estimated Completion Date:

10/1/2017 6/30/2019

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

The Utility Department is looking to install (2) 10,000 gallon bulk sodium hypochlorite storage tanks and rehabilitate the bulk storage containment area and piping. Bulk sodium hypochlorite tanks are used for storage of bleach waiting to be transferred to day tanks which are then required for use to disinfect the City's drinking water. In addition, this chemical is required for use in treating the concentrate water from the utilities' reverse osmosis treatment units. The current 14,000 gallon tanks (2) are over 15 years old and have reached the end of their useful lives. They were originally spected for storage of 6%, onsite generated bleach. The city currently uses 13% industrial bleach which attacks the interiors of the tanks and fittings. We have experienced multiple leaks and fear a total failure which would cause a large safety and cleanup issue as well as a great risk to the safety of the City's drinking water supply.

Project Title: Water Main Replacement Program

Project Number:

Estimated Start Date: continuous Estimated Completion Date: 9/30/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Relocate water mains and associated appurtenances from the rear easement of properties. To safely and efficiently maintain water mains, service lines, valves and meters. Current rear lot locations hinder the City's ability to properly maintain and repair water mains and associated appurtenances due to the difficulty and/or lack of access to the facilities. In the event of a repair, significant damage is caused both in gaining access and performing the repair due to their locations. Many of these facilities are also heavily tuberculated resulting in possible water quality and decreased pressure problems. Phase 6 in FY 2019 and Phase 7 in FY 2020

Project Title: Water Service Line Replacement

Project Number:

Estimated Start Date:

continuous

continuous Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

Replace old potable water service lines in areas with high leak reports (Pinebrook South and Venice Municipal Park). To decrease the number of service line breaks caused by brittle and old pipe. To improve water quality, minimize customer service interruptions and damage to surrounding areas caused by the service line failure and decrease after hours calls for associated repairs. There has been continous pressure problems at Estancias of Capri due to old service lines - replacement to be done in FY 2019

Project Title: Well Replacement

Project Number:

Estimated Start Date:

8/1/2020

Estimated Completion Date:

8/1/2021

Relationship to Community Vision and City Council Strategic Goals

investment Objective:

Maintain Service

Strategic Plan Goal: Standard Operational Needs

Description/ Justification:

Replace or re-drill and construct an existing unusable production well. A permitted production well has failed and is now unusable. Returning this well to operation will ease the pumping demands on the City's existing older production well; thereby improving the over all water supply system. Engineering services to begin in FY 2020 and construction completed in FY 2021.

Project Title: WRF Building Improvements

Project Number:

Estimated Start Date:

10/1/2019

Estimated Completion Date:

9/30/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Construct various building improvements (to include exterior painting) to existing administration and operations buildings. There is considerable unused space in the lab which could be transformed into two offices for staff. In addition, minor improvements to the administration building would make better use of available space.

Project Title: WTP Building D (Meter Shop) Upgrades

Project Number:

10/1/2018 **Estimated Start Date:** 1/31/2020 Estimated Completion Date:

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

▼ Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Upgrades include, replacing the current building with a two story building that works as the meter shop and warehouse on the first floor and office space on the second. This project is estimated to consist of replacing the current 1,320sq/ft building with a two story 2,640sq/ft multi purpose building. This would eliminate the confined work/storage space of the current structure. In addition, this project would improve the working environment for COV personnel and eliminate damage to structure and electrical/electronic equipment.

Project Title: WTP Day Tank Building Upgrade

Project Number:

Estimated Start Date: 10/1/2018 Estimated Completion Date: 9/30/2019

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Building is a manufactured fiberglass structure that is used to house our chemical daytanks used for treating the cities drinking water. Building is well over 20 years old and is starting to rot from exposure to the elements. In addition to chemical daytanks and pumps the building also housed digital chemical scales that shouldn't be exposed to the weather.

10/1/2019 **Estimated Start Date:** Estimated Completion Date: 9/30/2020

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Current security fencing at the Water Treatment Plant has reached the end of its useful life. It is industrial looking chain link with barb wiring topping. It is rusted and in places damaged. The Utility Department is looking to replace it with vertical steel security fencing. It provides the security required for a Water Treatment Plant and fits in with the theme of the proposed building upgrades.

Project Title: WTP Second Stage Membrane Addition

Project Number:

Estimated Start Date:

10/1/2019

Estimated Completion Date:

9/30/2021

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Maintain Service

Strategic Plan Goal: Required Regulatory

Description/ Justification:

In order to provide additional production capacity, a second stage membrane addition will need to be added to the WTP treatment process. The City is required to ascertain the possibility of achieving a recovery rate approaching 75% through the use of a second pass. The City's SWFWMD water use permit requires a pilot study for the addition to improve plant recovery which would lead to the addition of the second stage membrane pass to the current RO units.

STORMMATER EAPERSES	_	\$ 768,000 \$	35,000	<u> </u>	- 1	300,000 \$	1,103,000

Department/Division:

Engineering City Engineer

Contact Person:

Project Title: Live Oak St. Stormwater Improvements

Project Number:

TBD

Estimated Start Date:

18-Nov.

19-Aug. **Estimated Completion Date:**

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

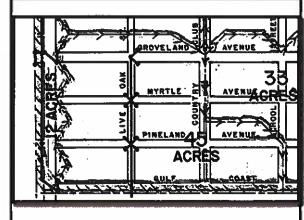

The existing 30" PVC stormwater outfall pipe at beach outfall #7 is too deep to be properly maintained and has caused three (3) major erosion events in the past 5 years. This issue is also contributing to flooding upstream. This project is to raise the pipe outfall elevation to a level which will allow for proper maintenance and flow. The design & permitting will be performed in-house.

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

Description/ Justification:

Complete a pipeline replacement project on the failing stormwater system along Live Oak St. and remove obstructions blocking drainage. The stormwater system along Live Oak has multiple failing joints which are causing road settlement and numerous obstructions which are blocking proper drainage and prevent proper maintenance on the facility. This project will result in an improved drainage level of service for this neighborhood.

19-Mar **Estimated Start Date:** Estimated Completion Date: 19-Aug.

Relationship to Community Vision and City Council Strategic Goals

Investment Objective:

Upgrade Service

Strategic Plan Goal: Upgrade City Infrastructure & Facilities

*

Description/ Justification:

There is an existing sidewalk gap on Ridgewood Avenue, which forces pedestrians to traverse through grass and dirt to get to the new US-41 Bypass sidewalk. Project is to install 480 ft. of 5 ft. wide sidewalk on the south side of Ridgewood Ave. The project design will be performed in-house by the Engineering Dept.
