

City of Venice, FL

FY 2018 Fire Protection Assessment Study

Final Report

July 24, 2017

July 24, 2017

Mr. Edward F. Lavallee City Manager City of Venice, FL

Re: FY 2018 Fire Protection Assessment Study

Stantec Consulting is pleased to present this Final Report of the FY 2018 Fire Protection Assessment Study that we have conducted for the City. This report presents the final analysis of the study to be provided to the City Council for adoption alongside the Final Resolution.

If the City has any questions, please do not hesitate to call me at (904) 247-0787 or email me at <u>michael.burton@stantec.com</u>. We appreciate the opportunity to be of service to the City, and look forward to the possibility of doing so again in the near future.

Sincerely,

Michael E. Burton Director

Section 1. INTRODUCTION

This report presents the results of an analysis to develop a new Fire Protection Non-Ad Valorem Assessment Program for the City of Venice, FL (the City). This study intends to create a Fire Protection Assessment program that would recover the full or partial costs associated with providing Fire Protection service to the City. The methodology uses current property and cost data to create a fair and equitable assessment structure that achieves this goal. The term "Fire Protection" as used in this study refers to the twenty-four hours per day, seven days per week service for fire suppression provided by the City to properties located within its limits, including first responder service. This study was conducted by Stantec Consulting, a firm that specializes in providing rate and assessment consulting services to local governments.

1.1 STUDY OBJECTIVE & PROCEDURE

The objective of this study is to calculate a Fire Protection Non-Ad Valorem Assessment Program resulting in assessment rates that will recover the full or partial cost requirements of providing Fire Protection service to properties within the City limits for FY 2018 and subsequent years. The costs associated with these services are recovered in proportion to the benefit received from these services provided by the City.

The study first identifies the full Fire Protection cost requirements for Fiscal Year (FY) 2018 that recognizes the high level of service traditionally provided by the City. We also projected annual cost requirements for providing Fire Protection in each year of a multi-year projection period from FY 2018 through FY 2022. This was accomplished through several interactive work sessions with City staff to confirm allocation parameters, cost escalation rates and the projected capital improvement plan.

The projection of costs through FY 2022 calculates the necessary annual adjustments to the Fire Protection Assessments in order to achieve 100% cost recovery through the projection period. This phase of the analysis is used to calculate the maximum assessment rates that could potentially be adopted alongside the FY 2018 assessment rates. The maximum assessment rate is intended to provide the City with the means of adjusting the Fire Protection Assessments in future years in order to achieve or maintain 100% cost recovery without having to undergo the special notification and

hearing procedures instituted for initial assessment adoption, methodology updates or rate adoption beyond the current maximum adopted rate.

The FY 2018 Fire Protection service revenue requirement was then apportioned to vacant and improved residential and non-residential property classes based upon property data obtained from the Sarasota County Property Appraiser's Office (Property Appraiser). Property classifications were based upon Department of Revenue (DOR) property use codes for each parcel as maintained on the Property Appraiser's database. Once the allocations were complete, a Fire Protection Assessment rate structure was developed and specific Fire Protection Assessment rates were developed, the results of which are presented herein.

Section 2. SPECIAL ASSESSMENT METHODOLOGY

The development of a non-ad valorem assessment to fund Fire Protection service requires that the services and facilities for which properties are to be assessed confer a special benefit upon the property burdened by the special assessment. Simply stated, there must be a logical relationship between the services and facilities provided and the benefit to real property assessed.

In addition to the special benefit requirement, the costs associated with providing the services and facilities must be reasonably apportioned to the properties that receive a benefit from Fire Protection service in proportion to the benefit received. Therefore, the recommended Fire Protection Assessments calculated in this study were developed such that the costs incurred by the City in providing Fire Protection service will be recovered through assessments to properties in proportion to the benefit received by the availability of Fire Protection service to all properties and by the protection from loss of structures due to fire on improved property.

This section describes the assessment methodology used to develop the Fire Protection Assessments in this report. The first section discusses relevant Florida Law regarding Special Non-ad Valorem Assessments, followed by sections discussing how Florida Law has been applied to the determination of special benefit and the apportionment of the annual revenue requirements of the Fire Protection Assessment to benefitting properties.

2.1 FLORIDA LAW GOVERNING SPECIAL ASSESSMENTS

This section discusses relevant Florida Law regarding special non-ad valorem assessments as it relates to the proposed Fire Protection Assessment program. The discussion covers how Florida law relates to special benefit and proportional benefit.

Special non-ad valorem assessments are a revenue source available to local governments in Florida to fund operations and maintenance expenses and capital improvements for essential services such as roads, drainage, Fire Protection services, utilities, etc. Florida courts have long held that Fire Protection services provide a special benefit to real property burdened by an assessment. See, e.g., <u>Fire Dist. No. 1 of Polk</u>

<u>County v. Jenkins</u>, 221 So.2d 740, 741-42 (Fla.1969); <u>Desiderio Corp. v. City of Boynton</u> <u>Beach</u>, 39 So. 3d 487, 494 (Fla. Dist. Ct. App. 2010).

Pursuant to Florida case law, two requirements must be satisfied for the imposition of a valid non-ad valorem special assessment. These two requirements have become known as the two pronged test. They are 1) the property assessed must derive a special benefit from the service provided, and 2) the assessment must be fairly and reasonably apportioned among the properties that receive the special benefit.

In considering special benefit, the following question must be considered: "Can a special benefit be derived from Fire Protection service by all properties within the City to meet the first prong of the two pronged test, even if all properties are not improved and/or do not receive calls for service?". The answer is yes based in part upon the Florida Supreme Court determination in <u>Fire City No. 1 of Polk County v. Jenkins</u> that a sufficient special benefit was derived by the availability of fire services to justify the imposition of the special assessment¹. Also, in <u>Meyer v. City of Oakland Park</u> the Court upheld a sewer assessment on both improved and unimproved property, stating that the benefit need not be direct or immediate but must be substantial, certain and capable of being realized within a reasonable time². In <u>City of Hallendale v. Meekins³</u> the Court indicated that the proper measure of benefits accruing to property from the assessed improvement was not limited to the existing use of the property, but extended to any future use which could reasonably be made.

2.1.1 PROPORTIONAL BENEFIT

It is well settled under Florida law that local governments are afforded great latitude regarding legislative determinations of special benefit and reasonable apportionment of costs. Specifically, the Florida Supreme Court has held that in cases where valid alternative methods of apportionment exist, the legislative body's determination should be upheld, unless that determination was arbitrary, and a court should not substitute its judgment for that of the local legislative body. In <u>City of Boca Raton v.</u>

¹ Fire City No. 1 of Polk County v. Jenkins, 221 So,2d 740 (Fla. 1969)

² Meyer v, City of Oakland Park, 219 So.2d 417 (Fla. 1969)

³ City of Hallendale v. Meekins, 237 So.2d 318 (Fla. 4th DCA 1970), aff'd, 245 So.2d 253 (Fla 1971)

<u>State of Florida</u>⁴ the Florida Supreme Court stated that the apportionment of benefits is a legislative function, and if reasonable persons may differ as to whether the land assessed was benefitted by the local improvement, the findings of the City officials must be sustained. Further, in <u>City of Boca Raton v. State of Florida</u> the Florida Supreme Court also determined that the manner of the assessment is immaterial and may vary within the City, as long as the amount of the assessment for each tract is not in excess of the proportional benefits as compared to other assessments on other tracts. A local government can assign to each property, which is subject to the assessment, a different category designation with each category having a different assessment rate.⁵

2.1.2 TWO-TIER FIRE ASSESSMENT METHODOLOGY

In <u>Morris v. City of Cape Coral</u>, 163 So. 3d 1174 (Fla. 2015), the Florida Supreme Court recently held that a city's two-tier methodology for assessing developed and undeveloped property was a reasonable method of apportioning the costs associated with providing Fire Protection services and facilities to all property owners, and was not arbitrary. Specifically, the Court upheld the city of Cape Coral's determination to adopt a methodological approach recommended by Burton & Associates that apportioned costs based on the general availability of Fire Protection services to all property owners in tier 1, and in tier 2, provided the additional benefit to improved property owners of protecting structures from damage. The two-tier methodological approach upheld in <u>Morris v. Cape Coral</u> was similarly adopted by the multiple Cities throughout the state of Florida. This report recommends that the City of Venice utilize the two-tier approach for assessing Fire Protection services for developed and undeveloped properties within the City limits.

⁴ City of Boca Raton v. State of Florida, 595 So.2d 25 (1992)

⁵ Workman Enterprises, Inc. v. Hernando County, 790 So.2d 598 (Fla. 5th DCA 2001.); Desiderio Corp. v. City of Boynton Beach, 39 So. 3d 487, 498 (Fla. 4th DCA 2010)

2.1.3 SPECIAL BENEFIT – THE FIRST PRONG OF THE TWO PRONGED TEST

All tax parcels, developed and undeveloped, are benefited by the mere availability of fire protection services. Such benefit is independent of, and realized even in the absence of, a call or need for actual service. The benefits include:

- Continuous availability of immediate response to fire.
- Provision of first responder medical aid to protect the life and safety of occupants.
- Enhanced property value, marketability of and/or ability to develop property.
- Protection against the spread of fire to neighboring parcels, thereby limiting and containing liability.
- Increased use and enjoyment of the parcel derived from continual and immediately available comprehensive fire protection service should the need arise.
- Enhanced marketability and value of the parcel when compared to a similarly configured parcel for which fire protection services are unavailable.

Individual tax parcels are the constituent units, which comprise the physical environment of the community as a whole. The parcels, in the aggregate, define the geography of the community and establish the service area within which the community must ensure preparedness and readiness to serve. The parcel composition as a whole is a primary factor, together with policy decisions regarding service levels, which determines the size and scope of the fire department and therefore the annual costs incurred in maintaining continual readiness to serve the community. The mere availability of fire protection services and facilities benefits each parcel because each contributes to a common burden placed upon community services, facilities and resources collectively created by individual parcels whether a fire event occurs or not. Fundamentally, the existence and presence of each parcel within the community creates a comparable and similar requirement to stand ready to serve and continually maintain a preparedness to provide fire protection and associated services and facilities for all parcels.

In addition to the benefits conferred upon all parcels in the City, the following Tier benefits are additionally conferred upon improved parcels:

- The ability to obtain property and/or fire insurance and obtain that insurance at attractive rates because of the availability of fire protection services, and
- Protection against loss of structures provided by the availability of fire suppression service provided by the City and the avoidance of replacement costs (either through direct replacement by the property owner or heightened insurance premiums which may result from claims)

Therefore, the first prong of the two pronged test (the property burdened by the assessment must derive a special benefit from the service provided by the assessment) is met because all properties in the City receive a special benefit from the availability of the City-wide Fire Protection service provided by the City.

2.1.4 FAIR APPORTIONMENT – THE SECOND PRONG OF THE TWO PRONGED TEST

In considering the assessment methodology, the second prong of the two pronged test requires that the costs of the assessment must be fairly and reasonably apportioned among the properties that receive the special benefit. In this Study we have developed an apportionment methodology based upon the readiness-to-serve availability of Fire Protection service to all parcels, improved and un-improved, and an additional benefit that this availability of service provides to improved property by the protection from the loss of the structures on improved parcels through the ability to obtain insurance at attractive rates and the ability of the City to respond to and suppress a fire.

Accordingly, the apportionment methodology recognizes two tiers of benefit:

- Tier 1 the simple availability of Fire Protection service which is available equally without discrimination to all parcels of all types within the City by virtue of the continued state of readiness to provide Fire Protection service that is maintained by the City, and
- 2. Tier 2 the protection from the loss of structures on the property provided by the availability of Fire Protection service by:
 - a. The ability to obtain fire insurance, and
 - b. The continued state of readiness maintained by the City so that when actual calls for service are received the City can provide fire suppression

service to protect property owners from the loss of structures on their property.

2.1.5 APPORTIONMENT OF FIRE PROTECTION COSTS TO BENEFIT COST POOLS

In order to apportion costs to benefitting parcels, the first step is to apportion the costs to be recovered in the Fire Protection Assessment to the Tier 1 - Response Readiness Benefit Cost Pool and the Tier 2 - Protection from Loss of Structures Benefit Cost Pool. The benefit of protection against loss of structures varies among improved properties in direct proportion to the structure value. The variance in benefit from property to property is analogous to fire or property insurance wherein the annual premium associated with the policy is informed in substantial part by the value of the assets covered under the policy. The insurance analogy is particularly appropriate in that fire protection services are themselves a form of insurance and may be thought of as the first line of insurance for most properties and the sole or primary source of insurance for underinsured properties.

The protection from the loss of the structures due to fire is best represented by the protection from the loss of the investment in the structure(s) or the avoidance of the cost of replacing the structure(s) on the property. Since the Tier 2 benefits are conferred to properties improved with structures and pertain to protection against loss of structure value and avoidance of replacement costs, the allocation of costs to the Tier 2 benefit pool should be reasonably related to structure value. As such, we have allocated the costs of fire protection service to the Tier 2 cost pool by the proportion of structure value to total just value within the City limits as presented in Table 1 below:

Value Component	Just Value	Allocation	
Total Structure Value	\$ 3,353,209,900		67.7%
Total Land Value	\$ 1,599,461,300		32.3%
Total	\$ 4,952,671,200		100%

Table 1

This approach to benefit cost allocation reasonably excludes land value from consideration because the land itself and any value associated therewith remains even in the event of a total fire loss for all structures on the parcel, and is consistent with the Tier 2 premise of the benefit conveyed by protection against loss of structures.

The balance of costs to be recovered through the special assessment are allocated to Tier 1 which, as described above, are imposed on an equal, per parcel basis since each parcel, developed and undeveloped, contributes equally to the common burden placed upon community services, facilities and resources in and benefits in substantially equal measure from the uniform response readiness and level of service provided by the Fire Department. Table 2 below presents the allocation between the two benefit tiers as described in this section:

Table 2

Assessment Rate Class	Assessment Unit	Allocation of Costs			
Tier 1 - Response Readiness Tier 2 - Structure Loss Protection	•	32.3% 67.7%			

2.1.6 APPORTIONMENT OF BENEIFIT COST POOLS TO PROPERTIES

The next step is to apportion the costs in each benefit cost pool to benefitting properties as follows:

1. <u>Tier 1 - Response Readiness Benefit Cost Pool</u>

All parcels in the City benefit from the availability of Fire Protection service that the City provides without discrimination as to property class on a 24 hours a day, seven days a week, year-round basis. This availability benefit is conferred upon all parcels whether or not a request for actual assistance to the parcel is ever received. These costs to maintain a constant state of readiness to serve apply to every parcel of real property in the City, are not associated with responding to actual incidents and will be incurred regardless of that parcel's character or use. Therefore, it is appropriate to apportion the costs in this cost pool to all parcels on a per parcel basis.

2. Tier 2 - Protection from Loss of Structures Benefit Cost Pool

Improved properties benefit from the protection from loss of the structures on the parcels. The protection from the loss of the structures due to fire is best represented by the protection from the loss of the investment in the structure(s) or the avoidance of the cost of replacing the structure(s) on the property. However, the actual investment or replacement cost of the structure(s) on the parcels in the City are not readily available. However, the structure values in the Property Appraiser's database are readily available and are the best data that is reasonably available as a surrogate representation of the relative investment or replacement cost of structures on each parcel in the City as compared to the investment or replacement cost of structures on all parcels in the City. In <u>Morris v. City of Cape Coral</u>, 163 So. 3d 1174, 1179 (Fla. 2015), the Florida Supreme Court found that the "use of property appraiser's structure value is reasonable because the property appraiser is statutorily required to use replacement cost to determine this value." Therefore, it is appropriate to apportion the costs in this cost pool based upon the relative value of structures on improved parcels as contained in the Property Appraiser's database. It is important to note that structure value is not taxable value and it is used simply as the best readily available surrogate representation of the relative investment or replacement costs of structures on each parcel in the City as compared to the investment costs of structures on each parcel in the City.

However, because structure value is not a precise, dollar for dollar surrogate for the investment or replacement cost of structures on parcels in the City, this benefit of protection from the loss of structures does not materially increase with every dollar of increase in structure value. Rather, it increases over a larger order of magnitude of increases in structure value. Therefore, we have determined that a reasonable Structure Equivalent Benefit Unit (Structure EBU) for this benefit cost pool that recognizes the relative value of structures on parcels as a surrogate for investment or replacement cost of those structures is \$5,000 increments of structure value (rounded down to the nearest \$5,000) as calculated in Section 2 – Analysis and Results.

2.1.7 DISCUSSION OF THE APPORTIONMENT METHODOLOGY

The apportionment methodology is based upon the property database maintained by the Sarasota County Property Appraiser, which is updated as properties within the City develop or are combined, split or subdivided. Therefore, the Fire Protection Assessments will be essentially self-correcting as the assessment roll is updated each year and vacant parcels upon which structures have been constructed are reclassified as improved parcels and their assessments are adjusted accordingly. Furthermore, this database can be accessed from year to year without extraordinary effort and cost to the City and provides a stable, reliable, reasonably accurate and cost effective basis for update of the assessment program from year to year.

The methodology is a benefit-based approach, which is the legal requirement for a non-ad valorem assessment. This methodology does not rely upon demand-based calls-for-service data. Rather, the recommended methodology herein focuses on benefit to the property based upon the availability of service which is a better matching of benefit received from the service provided, which is the availability of Fire Protection service on a 24 hours per day 7 days a week basis, which provides benefit to all properties regardless of whether or not requests for service are ever received from any class of properties, or individual properties.

This methodology recognizes the fact that...

First and foremost the Fire Protection resources maintained by the City are maintained to stand ready and available to provide Fire Protection service 1) to all real property, and 2) to protect improved real property from the loss of structures due to fire.

Therefore, the second prong of the two pronged test is met by the recommended approach that is based upon two tiers of benefit, 1) availability of service to all parcels, and 2) protection from loss of structures on improved parcels, both of which are derived from the continuous state of readiness maintained by the City to provide Fire Protection service on a 24 hours a day, seven days a week, year-round basis to these parcels whether or not requests for service are ever received from any class of properties, or individual properties.

Section 3. FIRE PROTECTION ASSESSMENT CALCULATION

This section presents the results of the Fire Protection Assessment calculations and our recommendations based upon those results.

3.1 NET REVENUE REQUIREMENT

The FY 2018 Net Revenue Requirement (NRR) will be the basis for the FY 2018 Fire Protection Assessment calculations. In addition to the FY 2018 NRR, the projection of costs through FY 2022 are used in order to identify the assessment rates necessary to fully fund Fire Protection services throughout the projection period (the Maximum Assessment Rate).

Florida case law requires that the imposition of a special assessment for Fire services may only fund Fire Protection services and first response rescue services. A Fire Protection Assessment may not fund Emergency Medical Services (EMS), including transportation (Florida Supreme Court opinion in <u>City of North Lauderdale v. SMM Properties</u>). Sarasota County provides Emergency Medical Services to properties within the City's boundaries and levies a special assessment via a Municipal Services Taxing Unit (MSTU) to recover the costs associated with such services.

Through discussions with City staff, it was determined that the nature of City Firefighter response is limited to Basic Life Support, as opposed to Advanced Life Support. In addition, City staff has indicated that the cross-trained Firefighters do not receive increased pay nor does the department incur additional costs to have the Firefighters cross trained as Firefighter/EMT, and does not employ costs for Firefighter/Paramedics. As such, no costs in the Fire Department budget were identified as related to EMS, and 100% of the FY 2018 proposed budget was included in the Net Revenue Requirement for the Fire Protection assessment.

3.1.1 PROJECTION OF NET REVENUE REQUIREMENT

In order to calculate the FY 2018 Net Revenue Requirement (NRR) for Fire Protection services, the allocated FY 2018 proposed Fire Protection budget was projected on a line item basis using cost escalation factors identified by City staff. The projected Capital Improvement Program were also provided by City Staff, and as such the Fire Protection

capital items were included in the budget projection. Schedule 1 of Appendix A presents the line item projection of the proposed FY 2018 Fire Protection budget, and Schedule 2 of Appendix A details the projected Capital Improvement Program. For the purposes of projecting the NRR, an annual average capital improvement cost was utilized. By utilizing an annual average capital improvement cost, the City maintains flexibility of the timing of projections while maintaining a funding source that will provide steady income for project planning. Schedule 2 of Appendix A details the development of the annualized CIP cost.

The projected budget was then used to develop the Net Revenue Requirement (NRR) to be allocated amongst the property classes for the FY 2018 Fire Protection Assessment calculations. In each year of the projection period, offsetting revenues from other sources were deducted from the previously identified expenditure requirements. A 4% allowance for early payment discounts and non-collections, a 2% estimation for Tax Collector's Expense, and a 2% estimation for Property Appraiser's Expense were included to determine the annual assessment revenue requirement. In the first year of the projection period (FY 2018), the estimated costs for administering the First Class mailing notices of the Assessment adoption were included. The final projection of Fire Protection Net Revenue Requirement for FY 2018 – FY 2022 is presented in Table 3 below. The Net Revenue Requirement in FY 2018 is the 100% Cost Recovery or Maximum Allocated costs for the assessments calculated herein.

Table 3											
Fire Protection Net Revenue Requirement Calculatio	n	FY 2018		FY 2019		FY 2020		FY 2021		FY 2022	
Fire Expenditures by Category											
Personnel Services	:	\$ 7	7,497,372	\$	7,395,635	\$	7,620,706	\$ 7,790,631	\$	7,642,426	
Operations & Maintenance	:	\$	550,145	\$	562,248	\$	574,618	\$ 587,259	\$	600,179	
Non-Recurring O&M	:	\$	-	\$	36,954	\$	113,273	\$ 11,898	\$	11,103	
5-Year Average Annual Capital Costs	:	\$	920,246	\$	920,246	\$	920,246	\$ 920,246	\$	920,246	
Total Fire Expenditures	:	\$ 8	8,967,764	\$	8,915,084	\$	9,228,843	\$ 9,310,035	\$	9,173,954	
Assessment Costs - Allowance for Early Payment	(1)	\$	377,000	\$	374,000	\$	388,000	\$ 392,000	\$	386,000	
Tax Collector's Expense	(2)	\$	189,000	\$	187,000	\$	194,000	\$ 196,000	\$	193,000	
Property Appraiser's Expense	(3)	\$	189,000	\$	187,000	\$	194,000	\$ 196,000	\$	193,000	
Assessment Notice Mailing Costs	(4)	\$	11,000	\$	-	\$	-	\$ -	\$	-	
Net Revenue Requirement for Assessment		\$ 9	9,733,764	\$	9,663,084	\$	10,004,843	\$ 10,094,035	\$	9,945,954	
Less: Fire Casualty Insurance Premium - Revenues	:	\$	(246,276)	\$	(246,276)	\$	(246,276)	\$ (246,276)	\$	(246,276)	
Less: Firefighters' Incentive - Revenues	:	\$	(9,850)	\$	(9,850)	\$	(9,850)	\$ (9,850)	\$	(9,850)	
Less: Fire Inspection Fees	:	\$	(48,000)	\$	(48,000)	\$	(48,000)	\$ (48,000)	\$	(48,000)	
Adjusted Net Revenue Requirement	:	\$ 9	9,429,638	\$	9,358,958	\$	9,700,717	\$ 9,789,909	\$	9,641,828	

(1) - Estimated at 4% of Net Revenue Requirement, rounded

(2) - Estimated at 2% of Net Revenue Requirement, rounded

(3) - Estimated at 2% of Net Revenue Requirement, rounded

(4) - Assessment Notice Mailing Costs are only imposed in the first year of the new Assessment Program. Estimated at \$0.75 per billed parcel.

3.2 APPORTIONMENT OF FIRE PROTECTION COSTS (NRR)

The next step is to apportion the costs to each benefit cost pool according to the allocation calculated in the previous section. The allocation between cost pools is derived by the ratio of total land value and total structure value of the City limits as discussed in the previous section of this report. The allocation of costs between tiers is presented below in Table 4.

Table 4 Assessment **FY 2018 NRR Rate Class** % Allocation **\$** Allocation Tier 1 - Response Readiness 32.3% \$ 3,045,773 **Tier 2 - Structure Loss Protection** 67.7% \$ 6,383,865 Total 100.0% \$ 9,429,638

3.3 PROPERTY DATA AND ASSESSMENT UNITS

The basis for creating the FY 2018 Assessment calculations and associated assessment roll is the parcel database as provided by the Sarasota County Property Appraiser. The property database identifies 16,253 parcels within the City. Each parcel was assigned units for the assessment calculations based upon the fields available through the Property Appraiser's database.

3.3.1 EXEMPT AND EXCLUDED PROPERTIES

Certain parcel types are exempt by State statutes or case law from non-ad valorem assessments such as this Fire Protection Assessment. Other parcels are typically excluded from such assessments because they receive no benefit from Fire Protection Services, such as lake bottoms, marshes, and other property types that will likely never develop. The excluded properties are identified by the property use codes contained in the Property Appraiser's database. These excluded properties are identified in the schedule of property use codes in Schedule 1 of Appendix B

This study has assumed the required exemptions for City, State, and Federally owned properties. In addition, newly required exemptions for Agricultural properties are included and described in subsequent sections. The exempted parcels are included in the cost apportionment, but will not be billed an assessment. The unrecovered revenue is funded through other City general revenues. In order to identify the exempt parcels, the exemption codes assigned to each property by the Property Appraiser were utilized.

Schedule 2 of Appendix B contains a list of all uniquely identified exemption codes and the exemption status for each code applied to this study.

3.3.2 SPECIAL CONSIDERATIONS FOR AGRICULTURAL PROPERTIES

The State of Florida recently passed CS/SB 1164: Special Assessments on Agricultural Lands. The law defines the special requirements as follows:

"Notwithstanding any other provision of law, a municipality may not levy special assessments for the provision of Fire Protection services on lands classified as agricultural lands under s. 193.461 unless such property contains a residential dwelling or nonresidential farm building, with the exception of an agricultural pole barn, provided the nonresidential farm building exceeds a just value of \$10,000."

In order to accommodate these new rules, we have adjusted the units identified in the FY 2017 Certified Fire Protection Assessment Roll using the following parameters:

- Agricultural parcels were identified by utilizing the property database's Agricultural Exemption Status field. If a parcel contained the Agricultural Exemption, it was identified as an Agricultural Parcel for the purposes of these adjustments.
- 2. Vacant Agricultural Parcels will be treated as exempt pursuant to the new law.
- 3. The building/structure file provided by the Property Appraiser was utilized to identify the structure value of all structures on the parcel. If a structure value was less than \$10,000, it was exempted from the calculation.

3.4 ASSESSMENT RATE CALCULATION

3.4.1 IDENTIFICATION OF ASSESSMENT UNITS

The following steps were taken in order to populate assessment units for the FY 2018 Assessment Rate calculations:

1. All parcels exempt, excluded or otherwise located within the City were identified by the full parcel database. Every property that was not labeled as excluded was apportioned one Tier 1 unit for the property's parcel benefit. Within the Property Appraiser's database, the fields labeled Building Value and Extra Feature Value were added together to arrive at the total Structure Value. This value was divided by the structure value EBU amount of \$5,000 to calculate the Tier 2 units.

Table 5 below presents the benefit cost pools and their corresponding assessment unit types:

Table 5

Assessment	
Rate Class	Unit Type
Tier 1 - Response Readiness Tier 2 - Structure Loss Protection	Per Parcel Per Value EBU ⁽¹⁾

 $^{(1)}$ Structure Value EBU (Equivalent Benefit Unit) is represented as every \$5,000 of structure value

3.4.2 IDENTIFIED ASSESSMENT UNITS

Following the assumptions and data points listed within this section, we have identified the following unit counts per benefit cost pool in Table 6 below that will be used to divide the costs allocated to each benefit cost pool for the Assessment Rate calculations:

Table 6

Assessment		
Rate Class	Units	Unit Type
Tier 1 - Response Readiness Tier 2 - Structure Loss Protection	16,215 663,154	Parcels Value EBUs

3.4.3 FULL COST RECOVERY RATE CALCULATION

To calculate the full cost recovery FY 2018 Fire Protection Assessments we utilized the apportioned costs and total units per property classification as identified in the previous sub-sections of this report. The amount of assessable costs allocable to each benefit cost pool was divided by the number of assessment units identified in each benefit cost pool to compute the Fire Protection Assessment as follows:

1. Tier 1 - Response Readiness Availability Benefit Cost Pool

All parcels in the City benefit equally from the availability of fire protection service that the City provides on call, without discrimination as to property class, on a 24 hours a day, seven days a week, year-round basis. These benefits include 1) availability of immediate response to fire, (2) first responder medical aid to protect the life and safety of occupants, 3) containment of liability for emergency incidents on the subject parcels and the spread of fires to other property, 4) enhanced property value, and 5) enhanced marketability of and/or ability to develop property. Therefore, it is appropriate to apportion the costs in this cost pool equally per parcel as calculated in Table 7 below.

Table 7

Tier 1 Rate Calculation								
Tier 1 Allocation of Costs:	\$	3,045,773						
Total Assessible Parcels:		16,215						
Tier 1 Rate per Parcel:	\$	187.84						

2. Tier 1 - Response Readiness Availability Benefit Cost Pool

In addition to the benefits that improved properties realize from Tier 1 benefits, improved parcels also benefit from protection from the loss of the value of structures on the property due to fire by virtue of, a) the ability to obtain fire insurance and to obtain that insurance at attractive rates because of the availability of fire protection service, and b) protection from loss provided by the availability of fire suppression service provided by the City,

The actual value protected is the investment in the structures or the avoidance of the cost of replacing the structures on the property in the case of fire, either through insurance or by the availability of fire suppression services provided by the City. The actual investment or replacement cost of the structures on the parcels in the City is not readily available. However, the structure cost values in the Property Appraiser's data base are readily available and they are the best data that is reasonably available as a surrogate representation of the relative investment or replacement cost value of structures for each parcel in the City as compared to the investment or replacement cost value of structures on other parcels in the City. Therefore, it is appropriate to apportion the costs in this cost pool based upon the relative cost value of structures on improved parcels as contained in the Building Cost Value and Building Extra Features data fields from the Property Appraiser's data base. However, because structure cost value is not a precise, dollar for dollar surrogate for the investment or replacement cost of structures on parcels in the City, this benefit of protection from the loss of structures does not materially increase with every dollar of increase in structure value. Rather, it increases over a larger order of magnitude of increases in structure cost value. Therefore, we have determined that a reasonable Equivalent Benefit Unit (EBU) for this benefit cost pool that recognizes the relative cost value of structures on parcels as a surrogate for investment or replacement cost of those structures is \$5,000 increments of structure cost value (rounded down to the nearest \$5,000), which results in a Tier 2 rate per EBU as calculated in Table 8 below.

Table 8

Tier 2 Rate Calculation								
Tier 2 Allocation of Costs:	\$	6,383,865						
Total Assessible Parcels:		663,154						
Tier 1 Rate per Parcel:	\$	9.63						

Table 9 below presents the calculated FY 2018 Fire Protection Assessment Rates at full (100%) cost recovery:

Table 9 - Calculation of FY 2018 Rates at 100% Cost Recovery

Assessment Rate Class	% Allocation		FY 2018 NRR Allocation	Allocated Units	Unit Type	FY 2018 100% Recovery Assessment		
Tier 1 - Response Readiness Tier 2 - Structure Loss Protection	32.3% 67.7%	\$	3,045,773 6.383.865	16,215	Parcels	\$ \$	187.84

Total	100.0%	\$	2,357,409					

3.4.5 ESTIMATED NET REVENUES

While the full cost FY 2018 Net Revenue Requirement is apportioned to all non-excluded properties, exempted property is included in the apportionment but cannot be billed/assessed. In addition, certain costs are born by the assessment itself such as the First Class mailing requirements in the first assessment year, 2% cost for Property Appraiser expense, 2% costs for Tax Collector expenses, and a 4% estimation for early payment discount and non-collections. Table 13 below presents the estimated net billed assessment revenue for each scenario, less exemptions and assessment costs at various cost recovery levels. Schedule 3 of Appendix A presents the assessment and revenue calculations in 5% cost recovery increments to provide the City with an array of options for revenue and rate targets.

% Cost Recovery	100%	75%	50%	25%
Net Revenue Estimation				
Allocated Assessment	\$ 9,429,638	\$ 7,072,228	\$ 4,714,819	\$ 2,357,409
Less: Shortfall for Exempted Properties	\$ (251,858)	\$ (188,893)	\$ (125,929)	\$ (62,964)
Net Billed Assessment:	\$ 9,177,780	\$ 6,883,335	\$ 4,588,890	\$ 2,294,445
Less: Allowance for Early Payment Discount	\$ (367,000)	\$ (275,000)	\$ (184,000)	\$ (92,000)
Less: Tax Collector Expense	\$ (184,000)	\$ (138,000)	\$ (92,000)	\$ (46,000)
Less: Property Appraisers Expense	\$ (184,000)	\$ (138,000)	\$ (92,000)	\$ (46,000)
Less: Notice of Hearing - Mailing Costs	\$ (11,000)	\$ (11,000)	\$ (11,000)	\$ (11,000)
FY 2018 Net Estimated Revenue	\$ 8,432,000	\$ 6,321,000	\$ 4,210,000	\$ 2,099,000
Tier 1 Rate per Parcel	\$ 187.84	\$ 140.88	\$ 93.92	\$ 46.96
Tier 2 Rate per Structure EBU	\$ 9.63	\$ 7.22	\$ 4.81	\$ 2.41

Table 13

Revenue Estimates at 25% Cost Recovery Increments

3.4.6 MAXIMUM ASSESSMENT RATES

The City may adopt a continuing assessment for future years that can be designed to maintain adopted cost recovery levels, with the actual annual adjustments to be determined by the City Council based upon need as determined by updating the financial management plan in subsequent years. If the City wishes to adopt a maximum Assessment Rate at the time of adoption of this Study, we have identified the maximum rate based upon the five-year projection.

Using the Net Revenue Requirement of the maximum year (FY 2022), the Maximum Assessment Rates at full cost recovery for the projection period are presented in Table 14 below.

Assessment Rate Class	% Allocation	FY 2018 NRR Allocation	Allocated Units	Unit Type	100%	Y 2022 Recovery sessment
Tier 1 - Response Readiness	32.3%	\$ 3,114,311	16,215	Parcels	\$	192.06
Tier 2 - Structure Loss Protection	67.7%	\$ 6,527,518	663,154	Value EBUs	\$	9.84
Total	100.0%	\$ 9,641,828				

Table 14

3.4.7 PROPERTY IMPACT ANALYSIS

Based upon the above referenced recommended assessment rates the following Table 15 presents a summary of the impact for representative types of parcels:

Parcel Type	Structure Value	Tier 1 Units	Tier 2 Units	Tier 1 Rate	Tier 2 Rate	Calculated Annual Assessment	Effective Monthly Assessment
Single Family Home - Low Value	\$100,000	1	20	\$187.84	\$9.63	\$380.44	\$31.70
Single Family Home - Average Value	\$190,000	1	38	\$187.84	\$9.63	\$553.78	\$46.15
Single Family Home - High Value	\$250,000	1	50	\$187.84	\$9.63	\$669.34	\$55.78
Single Mobile Home	\$80,000	1	16	\$187.84	\$9.63	\$341.92	\$28.49
Office/1-Story Single Tenant	\$150,000	1	30	\$187.84	\$9.63	\$476.74	\$39.73
Restaurant	\$920,000	1	184	\$187.84	\$9.63	\$1,959.76	\$163.31
Retail/Office	\$3,290,000	1	658	\$187.84	\$9.63	\$6,524.38	\$543.70
Grocery Store	\$8,260,000	1	1,652	\$187.84	\$9.63	\$16,096.60	\$1,341.38
Service Club	\$570,000	1	114	\$187.84	\$9.63	\$1,285.66	\$107.14
Yacht Club	\$2,190,000	1	438	\$187.84	\$9.63	\$4,405.78	\$367.15
Assisted Living Facility	\$2,690,000	1	538	\$187.84	\$9.63	\$5 <i>,</i> 368.78	\$447.40
Assisted Living Facility (Large)	\$27,770,000	1	5,554	\$187.84	\$9.63	\$53,672.86	\$4,472.74
Church	\$1,190,000	1	238	\$187.84	\$9.63	\$2 <i>,</i> 479.78	\$206.65
Vacant Parcel	\$0	1	0	\$187.84	\$9.63	\$187.84	\$15.65

Table 15 – Property Impact Analysis at 100% Cost Recovery Rates

The City Council has contemplated the assessment at 50% cost recovery in assessment workshops prior to the adoption hearings. As such, we have prepared the property impact tables at 50% cost recovery in Table 16 below:

Table 16 – Property Impact Analysis at 50% Cost Recovery Rates

Parcel Type	Structure Value	Tier 1 Units	Tier 2 Units	Tier 1 Rate	Tier 2 Rate	Calculated Annual Assessment	Effective Monthly Assessment
Single Family Home - Low Value	\$100,000	1	20	\$93.92	\$4.81	\$190.12	\$15.84
Single Family Home - Average Value	\$190,000	1	38	\$93.92	\$4.81	\$276.70	\$23.06
Single Family Home - High Value	\$250,000	1	50	\$93.92	\$4.81	\$334.42	\$27.87
Single Mobile Home	\$80,000	1	16	\$93.92	\$4.81	\$170.88	\$14.24
Office/1-Story Single Tenant	\$150,000	1	30	\$93.92	\$4.81	\$238.22	\$19.85
Restaurant	\$920,000	1	184	\$93.92	\$4.81	\$978.96	\$81.58
Retail/Office	\$3,290,000	1	658	\$93.92	\$4.81	\$3,258.90	\$271.58
Grocery Store	\$8,260,000	1	1,652	\$93.92	\$4.81	\$8,040.04	\$670.00
Service Club	\$570,000	1	114	\$93.92	\$4.81	\$642.26	\$53.52
Yacht Club	\$2,190,000	1	438	\$93.92	\$4.81	\$2,200.70	\$183.39
Assisted Living Facility	\$2,690,000	1	538	\$93.92	\$4.81	\$2,681.70	\$223.48
Assisted Living Facility (Large)	\$27,770,000	1	5,554	\$93.92	\$4.81	\$26,808.66	\$2,234.06
Church	\$1,190,000	1	238	\$93.92	\$4.81	\$1,238.70	\$103.23
Vacant Parcel	\$0	1	0	\$93.92	\$4.81	\$93.92	\$7.83

Section 4. SUMMARY OF RECOMMENDATIONS

4.1.1 FINDINGS OF BENEFIT SUMMARY

A properly developed cost apportionment methodology for Fire Protection Assessments will result in assessments that are proportional to the special benefit received from fire protection service provided by the City. Based upon the foregoing analysis and discussion presented in this report, we present the following summary of the finding of benefits:

<u>Tier 1 Benefit - Response Readiness Availability of Service</u> – Every parcel receives the benefit of the availability of the fire protection service provided by the City, without discrimination relative to location, property class, size or any other factors on a 24 hour a day, seven days a week, year-round basis.

<u>Tier 2 Benefit - Protection from Loss of the Value of Structures</u> – All improved properties with structures on them receive an additional benefit of protection from the loss of those structures due to fire as follows:

- Maintenance of Minimum Cost of Insurance By providing a favorable ISO rating, the City provides the property owner with the ability to obtain fire insurance at favorable rates.
- Benefit if Not Insured If not insured, properties owners have the assurance that they are protected from actual economic loss of structures on their property by the City's maintenance of fire protection resources that, if needed, can respond within reasonably short response times to provide substantial fire suppression to limit the amount of loss of structures that a fire could cause.

Furthermore:

Apportionment to Benefit Cost Pools - The annual revenue requirement for the Fire Protection Assessment is appropriately allocated 32.3% to Response Readiness Benefit (Tier 1) and 67.7% to Protection from Loss of Structures Benefit (Tier 2) based upon the proportion of the revenue requirement associated with the proportional value of land and structures within the City limits.

Apportionment of Benefit Cost Pools to Parcels

- <u>Tier 1</u> All parcels in the City, un-improved and improved, benefit equally per parcel from the Tier 1 - Response Readiness Availability Benefit. Therefore, the Tier 1 Benefit Cost Pool is appropriately apportioned equally to all parcels on a per parcel basis.
- <u>Tier 2</u> Improved parcels in the City benefit from the Tier 2 Protection from Loss of Structures Benefit in proportion to the value of the structure(s) on the parcel relative to the value of the structures on other parcels in increments of \$5,000 of structure value. Therefore, the Tier 2 Benefit Cost Pool is appropriately apportioned to improved parcels in the City in proportion to the value of the structure(s) on the parcels in increments of \$5,000 dollars of structure value (rounded down to the nearest \$5,000).

A summary of benefits conferred by benefit tier cost pool includes:

- <u>Tier 1 Applies to all parcels, improved and un-improved</u>. The special benefits provided to all parcels by the response readiness availability of Fire Protection Service provided by the City include:
 - o Availability of immediate response to fire,
 - o First responder medical aid to protect the life and safety of occupants,
 - Containment of liability for emergency incidents on the subject parcels and the spread of fires to other property,
 - o Enhanced property value, and
 - Enhanced marketability of and/or ability to develop property.
- <u>Tier 2 Applies only to improved parcels</u>. In addition to the special benefits that are conferred upon all parcels in the City by the Tier 1 response readiness availability benefit, the following additional benefits are conferred upon improved parcels:
 - Protection from the loss of the value of structures on the property due to fire by virtue of:
 - The ability to obtain fire insurance and to obtain that insurance at attractive rates because of the availability of fire protection service, and

• Protection of loss provided by the availability of fire suppression service from the City to respond to a call and to suppress the fire.

4.1.2 SUMMARY OF RECCOMENDATIONS

Based upon the results of the analysis presented herein, we recommend the following:

1. We recommend the Assessment Rates presented herein to be adopted by the City for FY 2018 at or below the full cost recovery calculation as shown in Table 17 below:

Table 17 – FY 2018 100% Cost Recovery Rates

Assessment Rate Class	Property Type	Unit Type	100%	Y 2018 Recovery essment
Tier 1 - Response Readiness	All property Improved or Vacant	per Parcel	\$	187.84
Tier 2 - Structure Loss Protection	Improved property only	per Structure EBU*	\$	9.63

*EBU is the Tier 2 Equivalent Benefit Unit, representing \$5,000 of Structure Value

3. In order to provide the City the ability to adjust the adopted Assessment Rates to fund 100% of future Fire Protection costs, we recommend the City adopt the maximum projected rates at the time of the FY 2018 rate adoption.

4. We recommend the assessment calculations are updated approximately every five years to keep pace with ongoing changes in costs and property demographics.

DISCLAIMER

This document was produced by Stantec Consulting Services, Inc. ("Stantec") for City of Venice, FL and is based on a specific scope agreed upon by both parties. In preparing this report, Stantec utilized information and data obtained from the City or public and/or industry sources. Stantec has relied on the information and data without independent verification, except only to the extent such verification is expressly described in this document. Any projections of future conditions presented in the document are not intended as predictions, as there may be differences between forecasted and actual results, and those differences may be material.

Additionally, the purpose of this document is to summarize Stantec's analysis and findings related to this project, and it is not intended to address all aspects that may surround the subject area. Therefore, this document may have limitations, assumptions, or reliances on data that are not readily apparent on the face of it. Moreover, the reader should understand that Stantec was called on to provide judgments on a variety of critical factors which are incapable of precise measurement. As such, the use of this document and its findings by the City should only occur after consultation with Stantec, and any use of this document and findings by any other person is done so entirely at their own risk.
