Subject: Oppose petition 17-13RZ

Dear Planning Commissioners ,

I would imagine the writing is on the wall for this property, but I still feel a need to voice my opposition. Please ask Mr. Neal to tread lighter on this environmentally sensitive land. I am very disappointed to hear you approved the first plat for "The Woods" even though there were encroachments to wetlands and their buffers.

As I have mentioned in previous emails , larger buffer zones around the many wetlands that are on this property would help mitigate some of the negative impacts that this development is sure to have on the wildlife in this area. Larger wetland buffers along with larger setbacks from Border Rd would help retain some of the native Pine flatwoods that will be destroyed. You didn't give that courtesy to "The Woods " land or Milano , but it's not too late to extend that courtesy to this beautiful piece of native habitat.

It's a shame that the environmental value of this land was not appreciated when it was annexed many years ago. The city and the county both are to blame. Now it's up to you and the council.

Thank you , Krista Rossmann
