Propose a reduction for the City of Venice's use of fossil fuels which impact cost and environment. This is accomplished by using measurable standards as listed below.

1. Develop a baseline of usage from 2017 FPL KWs and fuel gallon usage (gas, diesel, etc)
2. Have a 10% reduction annually in FPL kws for each of the next 5 years starting 2018 thru 2022.
3. Have a 5% reduction annually in gallons of fuel use(vehicles, lawn mowers, power equipment etc,) for each of the next 5 years starting 2018 thru 2022.
4. Calendar years to be used for measurements and finance department will issue a quarterly report on data toward meeting goals and costs savings quarterly within the regular finance business report.

Note: FPL KWs Baseline may have adjustments due to adding more meters.

Regards,
Vice Mayor Bob Daniels
City Of Venice , Florida
