Subject: Community Center Parking Lot Lights

The new library project has moved most of their parking lot into the community center North Lot. They are replacing our old lights with new LED lights.

We have 4 lights left that are over 30 years old using the old bulb system . These lights are in front of our Historic Triangle Inn.

Motion, request our city manager to ask the county what it will take to replace the remaining 4 old lights. Replacing the last 4 would make our North Lot with new LED energy efficient lights. Also these new lights provide more light with the new bulbs.

Sincerely,

Vice Mayor, Bob Daniels
