

Monument sign for Laurel Rd E frontage. 180 sq ft allowed, assuming minimum 60 linear feet of building frontage.
Sign to include LED board at maximum 50% sign face area.

Secondary EMERGENCY sign allowed up to 20 sq ft. Future sign could be attributed to subsequent building along Pinebrook Rd.

Illuminated SMH logo (channel letters) sign facing I-75 right-of-way. Maximum 75 sq ft, mounted to building facade.

May be a Monument ID

Monument sign for Pinebrook Rd frontage. 180 sq ft allowed, assuming minimum 60 linear feet of building frontage.
Sign does not include LED board (one allowed per site).

All remaining directional signs, entrance identification sign and parking identification signs allowed up to a maximum of 12 sq ft in sign face area per sign.

Zoning District OMI Office Medical Institutional with special standards for hospital signage.

Request the following deviations:

1. Monument, guide and entrance identification signs to be internally illuminated such that:
 - Emergency glows red with white copy at night; and
 - Destination names, arrows and symbols are cut-out/ push-thru copy that glows white at night.

Identify the following clarifications:

1. Hospital signage requirements identified as "square feet in area" is assumed as "Sign Face Area" not "Sign Structure Area."
2. Hospital signage requirement does not stipulate maximum sign height for monument signs, and it is assumed that the two primary monuments may be taller than 15 feet.
