xFold rigs X12 U11 RTF Overview

FAA to Streamline Permit Process
for Drone Filming

[Read More >](#)

*The **Dragon X12 U11 Drone** from **xFold rigs** comes in ready-to-fly (RTF) bundle with everything needed to capture aerial footage. The heavy lifter is designed to carry loads up to 100 lb. It features the gStabi H16 3-axis digital gyro-stabilized gimbal for DSLR/cinema cameras. It includes two remotes and a Connex zero latency video downlink system that operate within 1.2 miles. Once filming is done for the day, the Dragon drone folds down to a 35.4 x 19.7" footprint for easy transport. In addition to the gimbal and video downlink, this ready-to-fly bundle features two 14-channel xFold/Futaba transmitters (radio controllers), two flight batteries, one custom flight case for the aircraft, and one hard-shell case for the radios/gimbal.*

Professional aerial cinema platform
