GCCF
PLANNED UNIT DEVELOPMENT (PUD)
BINDING MASTER PLAN
July 9, 2019
ADOPTED BY ORDINANCE NO. 2019-_____
_____, 2019

GCCF PUD

PROJECT NARRATIVE

The proposed GCCF PUD is 300 +/- acre property located south of Laurel Road, north of Border Road, east of I-75 and the City's wastewater treatment plant, and west of the Milano PUD. The property is located within the Northeast Neighborhood of the City's Comprehensive Plan and is designated Mixed Use Residential on the Future Land Use Map. The property consists of the previously approved The Bridges CMU (Ordinance No. 2008-24) and the previously approved Villa Paradiso PUD (Ordinance No. 2006-10). Together the two currently approved binding development plans for the property authorize up to 1,794 residential dwelling units with a mix of residential housing types, and up to 160,00 square feet on non-residential uses.

The applicant proposes a rezoning to Planned Unit Development (PUD) which would combine The Bridges CMU and the Villa Paradiso PUD into a single PUD (GCCF) for the development of a residential community consisting of detached single- family homes, paired villas, multi-family homes, assisted living facilities, amenity centers, and open space. A 25 +/- acre portion of the property will also allow for House of Worship as permitted use, and Medical Office as a Special Exception Use, as an alternative to residential. The proposed density is up to 1,300 residential units (approximately 4.3 dwelling units per acre), a 27 % reduction in the currently approved density for the site. The proposed GCCF PUD will also reduce building heights, increase perimeter setbacks, and increase open space as compared to the currently approved zoning.

Access to the site will be via Laurel Road and Border Road. Consistent with Comprehensive Plan Strategy TR-NE 1.1.4 a north/south roadway connection between Laurel Road and Border Road will be provided through the GCCF PUD. In addition, where common ownership with the Milano PUD to the east exists, one or more optional interconnections between the properties shall be permitted. The circulation plan for the GCCF PUD will provide opportunities for multi-modal connectivity, and will include a linked sidewalk system for pedestrian connectivity from each of the development pods throughout the PUD. Further, sidewalk linkages along Laurel Road and Border Road will be provided to the project limit.

All internal roadways will be privately owned and maintained. The on-site storm water management system will be privately owned and maintained. Water and wastewater facilities will be dedicated to the City of Venice.

COMPLIANCE

The proposed GCCF PUD plan is consistent with all applicable elements of the City's Comprehensive Plan. Specifically, the proposed GCCF PUD is consistent with the Northeast Neighborhood plan and the existing and future land uses therein, including Strategy LU-NE 1.1.1. which designates the property Mixed Use Residential (MUR) and allows for up to five (5) dwelling units per acre.

Pursuant to Comprehensive Plan Strategy LU- NE 1.1.1. C LU-1.2.16.6.c a minimum of 50% open space will be provided including a minimum of 10% Functional and 10% Conservation Open Space.

As noted above, consistent with Strategy TR-NE 1.1.4 a north/south roadway connection between Laurel Road and Border Road will be provided through the GCCF PUD.

In addition, the GCCF PUD plan is in compliance with the applicable Intents and Strategies of the Transportation, Open Space, Housing, Infrastructure, and Public Schools Elements of the Comprehensive Plan.

Finally, the proposed GCCF PUD is in compliance with the City of Venice Land Development Code Sec. 86-130 requirements for Planned Unit Development (PUD) Districts as outlined in the below Land Use and Development Standards.

LAND USE AND DEVELOPMENT STANDARDS

The following identifies the proposed development standards for the GCCF Planned Unit Development. In furtherance of the interpretation authority granted by the City of Venice Comprehensive Plan and Land Development Code, the Zoning Administrator shall have authority to administratively approve minor modifications of standards contained with the GCCF Planned Unit Development, excluding standards related to density, building height, buffer widths, and the addition of uses. Reasonable mitigation measures may be imposed by the Zoning Administrator to limit impacts from the requested adjustment of standards. PROPOSED GCCF PUD MODIFICATION TO STANDARDS

- 1) A modification to the requirements of Sec. 86-130 (q), concerning the requirement that no structure, including pool cages, shall be located closer to any perimeter property line than two times the height of such structure, is requested. The proposed modification is to reduce the required setback from perimeter property lines to one times the building height.

The proposed modification request is justified based upon the low intensity of the development plan, the extensive perimeter buffers and the significant amount of open space otherwise provided.

- 2) A modification to the requirements of Sec 86-232(5) concerning the roadway design standards is proposed and an alternative neighborhood roadway design is proposed. The proposed modification reduces right-of way width from 52' to 43', allows for sidewalks on one side of the neighborhood roadway only, and eliminates bike lanes for the neighborhood roadways.

The proposed modification request is justified based upon the protection of wetlands and their buffers afforded by the modification, and the low intensity of the development plan.
